ADENOID

During the summer months the symptoms caused by adenoids are not as noticeable as in winter. They are referred to now because this is an opportune time for having them attended to.

Adenoids are tumour-like growths that develop in the passage between the nose and throat. Very young children may have adenoids. The majority of cases occur in children from eighteen months to six years of age.

The presence of adenoids usually causes what is apparently a chronic cold in the head, with a great deal of discharge from the nose. These symptoms, with snuffles, occur during the winter season. Cough is frequently associated with the condition.

If the growths are large, the child will be a mouth-breather—breathing through the mouth day and night, because the natural breathing space through thd nose is blocked. This gives rise to snoring.

In advance cases, the child has a characteristic appearance of the face. The open mouth gives a stupid expression, the nostrils are small and pinched, the upper lip is thickened. The voice may have a nasal twang. The hearing may be impaired. Bed wetting may be part of the symptoms.

Complete removal is the only treatment for adenoids of any severity.

Parents who have been advised by their physician to have an adenoid condition corrected in their child should do so. Parents of children who show evidence of adenoids, as described, should have the children examined to find out the condition. The treatment of such a condition is advised because it interferes with the normal development of the child lowers his level of physical fitness and, if severe, results in a permanent deformity of the mouth and face.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

John Sakaluk Chivaried

Last Saturday night the many friends and well-wishers of John Sakaluk took occasion to give him a chivarie, following his recent marriage a couple of weeks previously. Upwards of fifty assembled at Len. Howarth's pool hall with the requisite paraphernalia for noise making, where they were marshalled and silently proceeded to the home of the bride and groom. Arriving at the house pandemonium was let loose for a while, when all were invited inside, where a most enjoyable time was spent. Toasts were tendered the newlyweds, and songs, recitations, violin and mandoline solos were rendered. At the close of a pleasant stay all departed wishing the newly married couple many happy returns, long life, and much happiness on the matrimonial sea of life.

Water-Power Resourses

The official information available at a central source regarding the water-power resources of Canada, as to capacity and availability is most complete. The Index Inventory System of investigating and recording water-power resources, originated by the Dominion Water Power Branch of the Department of the Interior and developed and carried out in full collaboration with the provincial governments, has resulted in all possible information on this subject respecting any river or district being available at the head office in Ottawa for any interests concerned.

Sentinel Hill Items

The storm on Sat. p m. last was quite severe in parts of this district where some damage from hail was sustained.

Mrs. Hewson entertained a number of young ladies of the district Saturday in honor of her niece Miss Kay Newsome, of Lumsden, Sask.

The W.I. are holding their Aug. meeting at Sentinel Hill School on Thursday evening, August 16. Mrs. Cameron and Mrs. G. Lee are the hostesses

Mr. and Mrs. H. Hoy and family, Mr. and Mrs. B. Hoy and family, and Miss E. Hudgeon are holidaying at Buffalo lake.

The friends of Mrs. A. Cameron gathered at the teacher's residence on Monday to convey to her their best wishes for a happy married life, and to present her with gifts on this happy occasion. The W.I.'s gift was a linen tablecloth, while the school children presented her with a salad bowl. Many other gifts both useful and ornamental, were showered upon Mrs. Cameron, who has made many friends since coming to the district as our teacher

Miss Ethel Newman has been successful in securing a school near Sibbald, Alta.

Owing to the heavy rain last Friday night the W.I. dance was postponed until further notice.

Mr. J. C. Hewson is being congratulated on the success attained by the pupils of his school who wrote the Grade VIII. departmental exams. The class of three were all successful.

Mr. V. MacNair has purchased a Minneapolis Combine with which to harvest his crop.

Allen Simpson of Newport school, succeeded in passing his Grade Grade VIII examination.

Mr. and Mrs. Geo. E. Hewson and daughter Beth, returned on Saturday from a motor trip to Regina, Indian Head and Lumsden, Sask.

Miss Kathleen Newman's pupils of her Entrance class, were very successful in the recent departmental exams. when two out of three passed.

Wedding Bells at Craigmyle

The United Church, Craigmyle, was the scene of an unusually pretty wedding at high noon on Tuesday, August 7th, when Margaret, second daughter of Dr and Mrs D T Crawford, became the bride of William Ronald Truswell, son of Mrs Wm Truswell, of Tabor. The ceremony was performed by Rev R W Griffith, of Craigmyle, and the church was tastefully decorated with plants, ferns and flowers. The bride, attired in a pretty white georgette dress trimmed with lace, wearing shoes and stockings to match and veil ornamented with a wreath of orange blossoms, looked very charming and dainty as she walked to the alter on the arm of her father, and was given away beneath a beautiful lattice arch gaily festooned with delicate pink and white flowers. She carried a bouquet of pink roses. Miss Flora Crawford, sister of the bride, wearing a dainty dress of shot taffeta, and Miss Verna Stevens charmingly gowned in peach georgette with frills of lace, and each carrying a bouquet of pink and mauve sweet peas, were the bridesmaids. The groom was supported by Cyril Bell, of Lethbridge.

The bridegroom's gift to the bride was a manicure set; to each of the bridesmaids a white gold bracelet set, with rhinestones; and to the best man, a gold pen-knife.

Immediately after the ceremony a reception was held at the home of the bride's parents where a delicious buffet luncheon was served to the relatives and friends. Mrs Crawford, mother of the bride, poured tea at a daintily appointed table centred with a huge bowl of shasta daisies and baby's breath.

The bride cut and served the wedding cake, and was assisted by Mrs G J Gibson, Miss Haster Bell and Miss Flora Crawford.

The number of beautiful gifts received by the happy couple testified to the esteem in which both are held by their many friends.

The young couple left later in the afternoon for Morrin to get the afternoon train to Calgary, on their way to Banff to spend their honeymoon, after which they will make their home at Carmangay, where the groom is the proprietor of a Drug Store.

Previous to her marriage Mrs Truswell was a school teacher at Taber, where the groom resided for some time, and is well known.

Guaranteed Tools

During the rush of the harvest season why be handicapped with poor tools? We are carrying a stock of Dasco, Enderes, Crescent, Bonney, and Bahco tools. These tools include wrenches, chisels, punches, pliers, screwdrivers, etc., and are **absolutely guaranteed.**

We carry the following lines of:

OILS AND GREASES

Polarine Oil, Polarine Gun Grease, Hard Oil, Mica Axle Grease.

Wm. Penn Tractor Oil, in all weights; Pen Gun Grease, Axle Grease, etc.

Also **Canadian Oil Products**

NEW UTILITY TRUCK

-another Sensational Chevrolet Value

4 Speeds Forward • 4 Wheel Brakes

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground!

Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, front shock absorber springs, air-bound seat cushions and channel front bumper. In addition, it offers all those basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rugged rear axle with one-piece banjo-type housing . . semi-elliptic springs set parallel to the load . . completely enclosed valve-in-head motor with air cleaner, oil filter and positive action vane type oil pump . . thermostatic control of water circulation . . low loading height . . generous road clearance and countless other features of comparable importance.

Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.

Price only $665

CHASSIS ONLY
AT WALKERVILLE, ONTARIO

Delia Agricultural Fair

The following is a list of prize winners at the Delia Agricultural Fair held on Wednesday, Aug. 8:—

Horses—Registered Stallions

Class 1.—Clydesdales, 3 years and over—1st, J Savage; 2nd, Horace Martin; 3rd, P. Bolin.

Clydesdales, under 3 years—1st, A. Stronech; 2nd, J. Savage; 3rd, A. Stronech.

Class 3, best trained colt, pure bred or grade, led into ring by trainer—1st, Alf. Rose; 2nd, Arnold Bryan; 3rd, Mrs R. Sloan.

Class 4, draft registered, Clydesdale filly, 2 years—2nd, J. Savage.

Clydesdale filly, 1 year—1st, Alf. Rose. Clydesdale dry mare—1st, and 2nd, J. Savage

Clydesdale mare in foal or foal at foot—1st and 2nd, Alex Stronech; 3rd, Alf Rose.

Clydesdale foal—1st Wm. Adams; 2nd, Alf. Rose; 3rd, Alex Stronech.

Sweepstakes—Alex Stronech.

Belgian filly, 1 year old—2nd W. J. Bryan.

Belgian dry mare—1st and 2nd, W. J. Bryan.

Class 5, heavy draft, registered or grade, any breed. Team hitched—1st. J Savage; 2nd, A. Stronech; 3rd, E. L. Long.

Class 6, draft, grade only, filly or gelding, 2 years—1st, A. C. McCully; 2nd, Charles Rider; 3rd W. J. Bryan.

Filley or Gelding, 1 year—1st, J. Savage; 2nd, A. C. McCully; 3rd, W. J. Bryan.

Dry Mare or Gelding—1st, Alf. Rose; 2nd, J. Marshall; 3rd, George Innes.

Mare in foal, or foal at foot—1st, A. Stronech; 2nd, A. C. McCully; 3rd, W. J. Bryan.

Foal—1st, A. C. McCully; 2nd, W. J. Bryan; 3rd, A. Stronech.

Sweepstakes—A. C. McCully.

Class 7, Agriculture (1300 lbs. or over), teams hitched—1st, A. C. McCully; 2nd, P Bolin; 3rd, Geo Innes.

Filly or Gelding, 2 years—1st, Chas Rider; 2nd, Wm Adams; 3rd, W. J. Bryan.

Filly or Gelding, 1 year—1st, A. C. McCully; 2nd and 3rd, Geo. Innes.

Dry Mare or Gelding—1st, A. C McCully; 2nd, P. Bolin; 3rd, Alf. Rose.

Mare in foal, or foal at foot—1st, A. C McCully; 2nd, W. Adams; 3rd, W. J. Bryan.

Foal—1st, A. C. McCully; 2nd, W. J. Bryan; 3rd, R. E Gillrie.

Sweepstakes—A. C. McCully.

Class 8, general purpose (1,150 to 1,300 lbs.),—no entries.

Class 9, carriage or roadster, team hitched—2nd, Mrs. R. Sloan.

Single driver, hitched—2nd, N Skippen.

Class 10, saddlers—1st, Olin Mc Kee; 2nd, E. L. Long; 3rd, W. W. Smith.

Boys' saddle poney—1st, J. Marshall; 2nd, A. C. McCully; 3rd, J. Marshall.

Girls' saddle poney—2nd, Jean Carter.

Pure—Bred Cattle

Class 12, Shorthorn Bull, 3 years—1st, W. W. Smith.

Shorthorn bull, 2 years—1st John Marshall.

Shorthorn bull, 1 year—1st, W. J Bryan; 2nd, W. Reeves; 3rd, W. Reeves.

Dual purposs cow — 1st, W. Reeves; 2nd, W. W. Smith.

Class 13, shorthorn cow, 3 years or over—1st W. Reeves; 2nd, D. Elliott; 3rd, D. Elliott.

Heifer, 1 year old—1st, W Reeves

Heifer Calf—1st D Elliott; 2nd, W. Reeves

Bull calf—1st and 2nd, W. Reeves; 3rd W. J. Bryan.

Sweepstakes—W. Reeves

Class 15, Holsteins, cow, 3 years or over—1st, W. Poland; 2nd and 3rd, N. Burke.

Heifer, 2 years old—1st, N. Burke

Heifer Calf—1 and 2, N. Burke.

Bull calf—1st and 2nd, N. Burke.

Class 16, Jerseys, cow, 3 years and over—1st, S. H. Ripper,

Class 17, Dairy. Grade cow, 3 years or over—1st, Margaret Duncan; 2nd and 3rd, P. Thompson.

Heifer, 2 years—1st, George Lowe; 2nd, N. Burke; 3rd, H. Skippen.

Heifer, 1 year old—1st and 2nd, Geo. Lowe; 3rd, W J. Bryan.

Heifer Calf—1st, N. Burke; 2nd, Geo. Lowe; 3rd, P. Thompson.

Class 18, Grade beef, cow, 3 years or over, calf at foot—1st, D J Elliot.

Heifer, 2 years old—2nd, Geo. Lowe.

Heifer, 1 year old—1st and 2nd, W. J. Bryan; 3rd W. J. Elliott.

Heifer or steer calf—1st and 2nd, R. E. Gillrie: 3rd, W. J. Bryan

Canadian Bank of Commerce silver cup for best female animal of any breed of cattle judged for beef qualities—Wm Reeves.

Dairy heifer, grade stock, pail fed born 1928, to be exhibited by child having cared for and trained the animal—1st, W. W Smith; 2nd, Harry Fletcher; 3rd, N. Burke.

Best calf beef type heifer or steer, born 1928—1st, R. E Gillrie; 2nd, Edna Bryan; 3rd Arnold Bryan.

Swine

Class 20, pure-bred Berkshire boars, 6 months or over—1st, J. Savage.

Berkshire boar, under 6 months, 1st, J. Savage.

Yorkshire boar, 6 months or over—1st, J. F. Hall.

Class 21, pure bred Berkshire sow, 6 months or over—1st, J. Savage.

Berkshire sow, under 6 months—1st, J. Savage.

Yorkshire sow, 6 monthes or over—1st and 2nd, J. F. Hall.

Yorkshire sow, under 6 months—1st, and 2nd, H. Martin.

Class 21a, grade sows. Berkshire sow, 6 months or over—1st, J. King.

Berkshire sow, under 6 months—2nd and 3rd, J. King.

Yorkshire sow, 6 month or over—1st, H. Moore.

Yorkshire sow, under 6 months—1st, P. Thompson.

Tamworth sow, 6 months or over—1st, G. Lee.

Tamworth sow, under 6 months—1st, E. L. Long.

Best bacon hog, not to weigh less than 160 lbs. and not more than 220 lbs.—1st, P. Thompson.

Class 32, boys and girls, pair of pigs, bacon type, born in current year—1st, Peter Thompson Jr.

Pair of pigs, thick smooth, born in current year—1st, Geo. Lowe Jr; 2nd, Bruce King.

Sheep

Class 22, pure-bred, Oxford ram, 2 years and over—1st and 2nd, G. Innes.

Oxford yearling ram—1st, Geo. Innes.

Oxford lamb ram—1st and 2nd, Geo. Innes.

Oxford lamb ewe—1st and 2nd, Geo. Innes.

Shropshire ram, 2 years and over—1st, C. M. Davis,

Shropshire ewe, two years and over—1st and 2nd, C. M. Davis.

Shropshire yearling ram—1st and 2nd, C. M. Davis.

Shropshire yearling ewe—1st and 2nd, C. M. Davis.

Shropshire lamb ram—1st and 2nd, C. M. Davis.

Shropshire lamb ewe—1st and 2nd, C. M. Davis.

Class 23, grade, any kind, ewe, yearling and over—1st, Mrs. A. Martin; 2nd, C. M. Davis; 3rd, G. Innes.

Wether, yearling and over—1st and 2nd, C. M. Davis.

Ewe lamb—1st. C. M. Davis; 2nd and 3rd, G. Innes.

Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an off year when, in some branch of human activity and endeavor, this young Dominion does not attract world attention to itself by some new and startling achievement.

Prior to the war, Canada was hardly known, even as a name, to the vast majority of the peoples of Europe, and those who recognized the name had but slight knowledge of the country. To most of the world, Canada was one of the colonies which Britain had scattered here and there over the face of the globe, but which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself, and other nations were suddenly made to realize that there had arisen in the western hemisphere a nation which already was helping to write history in large and impressive characters and was destined to have a profound effect upon international relations, political and economic. Canada's war effort served, perhaps as nothing of a less spectacular nature could have done, to turn the attention of the people of the United States northward, and awaken them to the fact that the whole of North America was not to be found within the confines of the republic; that, on the contrary, a second American power was rapidly developing at their very doors.

Since the war the reality of this fact has year by year been emphasized. Long the world's greatest exporter of wheat, the United States has seen Canada pass it and secure that title by a wide margin. Within the past year or two, the United States has been forced to also relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily, year by year, Canada has been passing other countries in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a volume of only minor importance to the total trade and commerce of the world a bare generation ago, Canada is now one of the world's greatest traders, a factor to be reckoned with in all the markets of the world. Before the war, dependent upon the money markets of Great Britain and the United States to finance its many undertakings, Canadians today are able not only to finance their own country, but to an ever increasing extent are financing huge undertakings in other countries, while at the same time rapidly buying back into full Canadian control many large corporations of this country which in years of our financial immaturity were financed and controlled by British and United States capitalists.

The war, and Canada's significant participation therein, also had the effect of raising the international status of the Dominion, giving it not only a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny thus called upon Canada to play its part in the International arena, this Dominion assumed the responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor nor insignificant one. Rather, Canada has wielded an influence possibly out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthily represented at the Olympiad, the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try conclusions with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world. The sons and daughters of the Dominion carried the flag of Canada to victory time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metres race, regarded as classics of the great meet. Ethel Catherwood, a Saskatchewan girl, won the high jump and in doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race. Considering the number of events in which the Canadians participated, no other country in the world approached their record.

Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games, and in the hands of such youth its position as a great agricultural, mining and manufacturings country, as a leader in world finance, and as an arbiter in international relations, is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy, and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

Russia and Peace Pact

Foreign Minister Of Soviet Republic Refers To Failure Of U.S. To Invite Russia To Sign

George Tchitcherin, foreign minister of the Soviet Republic, issued a lengthy statement to the newspapers hinting at the necessity of the Soviet being one of the original participants in Secretary of State Kellogg's anti-war treaty.

Tchitcherin said the United States' failure to invite the Soviet to sign the pact indicates "a desire to make the pact an instrument of isolation and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing wars "because it does not provide for obligatory disarmament."

Homes For French Poor

Paris is preparing to turn landlord on a large scale. Construction of modern apartments, on the site of one-time fortifications, is now under way. Officials estimate that 10,000 Parisian families will be housed in the new buildings at a cost of about $160 a year, for four rooms and bath.

Opportunities are like fish—the big ones always get away.

FALLING HAIR. Minard's rubbed into the scalp four times a week arrests falling hair, removes dandruff and promotes growth.

Will Need Trained Voices

Talking Movies Will Have To Be Pleasing To Audience

The "talking movie is just now being much talked about. Producers think it will greatly increase attendance on the pictures. That may be so. But it won't unless movie actors and actresses learn to speak as well as to "register emotion."

A voice has as much personality as a face, perhaps more. As long as it is not allowed to interfere with the face, all goes well; but when the face on the screen is fascinating, and the voice uncultivated and feeble, the contrast makes the audience either uncomfortable or amused. Neither state of mind is good for the box office.

Imperial Oil Development

Spending Million Dollars In Improvements To Regina Plant

When two new storage tanks to be built by the Imperial Oil Company for the plant at Regina are completed, the company will have spent something very close to $1,000,000 in improvements within 12 months.

Last year the company spent $750,000 in plant equipment. This year a road oil making plant has just been completed at a cost of $50,000. The two new storage tanks, both of them 120 feet wide, every way by 42 feet high, will cost something like $150,000.

GIRLS AND WOMEN NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills a Friend Indeed

Just because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing because they enrich the blood, give strength and restore tone to the aching nerves. The anaemic girl who is languid and pale; the wife whose back feels like breaking; the matron whose health fails as she reaches middle age—for all such sufferers Dr. Williams' Pink Pills are invaluable because ill-health in girls and women is usually caused by poor blood or insufficient blood. These pills have proved a blessing to thousands of others, why not you? At various stages of life Mrs. G. R. Lake, Walton, N.S., has proved the value of Dr. Williams' Pink Pills. She says:—"I first used these pills when a young girl, for it is during the 'teen age when nature calls upon every bit of the reserve strength we have, that we need their rejuvenating help. It was then I found Dr. Williams' Pink Pills a friend indeed. And again, now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills is the only tonic I take to keep up my health and strength, and they have never failed. Should any ailing girl or weary mother, due to my advice try these pills, I know they will find them as equally good as I have done."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Growing More Potatoes

Greater Acreage Was Planted To Tubers In Canada This Year

Two per cent. more acreage was planted to potatoes in Canada this year than last, according to the Dominion Department of Agriculture. All provinces report a slight increase in acreage with the excption of Saskatchewan and British Columbia. Conditions of crop are favorable throughout the Dominion, according to reports.

First Maid: Your fiancee stutters quite a bit, doesn't he?

Second Maid: Yes, but it doesn't matter. After we are married he won't have a thing to say, anyway.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

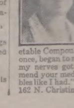

City Banker (visiting the farm)—"I suppose that's the hired man?"

Farmer (who had visited banks)—"No, that's the first vice-president in charge of cows."

The man who has enough money to live in idleness won't, and the poor man who would can't.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. John Benson, 162 N. Christina St., Sarnia, Ontario.

Homing Pigeon Service

Canada's Air Patrol To Have Help Of Little Winged Messengers

The Homing pigeon, little winged hero of the Great War, has been officially enrolled in Canada's air patrol. Today, the department of national defence announces creation of a Homing pigeon service as auxiliary to forest fire patrol and photographic survey.

A pilot now leaving for patrol work in northern areas flies over thousands of miles of wild, unsettled country; sometimes he is hundreds of miles from his base. In the event of a forced landing without means of communication with his base, his situation is precarious indeed.

To minimize the danger, small Homing pigeon lofts are to be established at all air stations. Before a pilot leaves his base two or more pigeons will be placed in small, specially constructed baskets, each bird in its own individual compartment, easily accessible to the pilot. In the event of a forced landing, a message giving details of the pilot's position and his needs will be inserted in a small aluminium tube attached to the leg of the pigeon, and the bird liberated. The same message will be despatched by the second pigeon to guard against the first being driven off its course by storm or attacked by hawks; for the hawk takes a heavy toll.

Members of the Montreal Racing Pigeon Association have contributed a number of birds as a gift to the new lofts and twenty-one have already been shipped to the High River, Alta., air station. The association is also co-operating in instructional work, loft management and the breeding and training of pigeons.

Ask Public To Order Coal Now

Railways State All Cars Will Be Required To Move Harvest Later

In order to assist the railway companies in the expeditious movement of the grain crop, and to prevent any possibility of hardship being worked on the public, the Railway Association of Canada is appealing to coal dealers and consumers in western Canada to place their winter fuel orders immediately.

While there is no shortage of cars for the handling of grain, there is every possibility that the harvest will be one of the heaviest in years, and it is expected that all of the 80,000 cars now assembled in western Canada will be needed to move the crop quickly. This movement, it is also thought, will commence from ten to fourteen days earlier than usual. Once this traffic begins the railway companies will not be able to divert cars to other purposes without adversely affecting the grain traffic. Therefore, the placing of coal orders now will release the maximum number of cars for grain purposes when they are most needed and, at the same time, obviate any possibility of coal shortages in various sections of the country at a later date.

Deny Responsibility

Reject Charge That Catholic Clergy Responsible For Murder Of Obregon

Bishop Miguel De La Mora, in behalf of the episcopal sub-committee, has issued a statement rejecting the charge that the clergy was responsible for the murder of president-elect Obregon.

He declared the fact that one Catholic priest and one nun were involved in the crime did not mean that the clergy as a body was responsible.

The statement asserted that it was publicly known that the Mother Superior, Conception Acebeda De La Lata was mentally deranged and that several cass of insanity have been reported in her family. The mother superior was named by Jose De Leon Toral, the slayer, as having indirectly influenced him.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Medicine Hat Canneries

Machinery is now being installed in the plant purchased by the Broder Canning Company and tomatoes and fruit from the Medicine Hat area and British Columbia will be canned there this fall.

Secure Grazing Lease

A lease for grazing purposes of 51,807 acres of land northwest of the South Saskatchewan river, has been granted the Home Ranch Company, Ltd., of Bow Island, Alta.

Greyhounds are perhaps the oldest known type of dog. Stone carvings dating back to about 400 B.C. show figures of these graceful animals.

A new home-savings bank has been patented. It is attached to a clock, which is wound every day by means of inserting a coin.

Venezuelans bought $138,000 worth of imported handkerchiefs last year.

Minard's Liniment for Blistered Feet.

"Christie's" of course

There is something so exceptionally appealing about Christie's Assorted Sandwich. A combination of deliciously flavored cream fillings and crisp biscuits that fairly melt in your mouth. Vanilla, Chocolate, Strawberry, Orange flavors.

In the store or on the 'phone, always ask for

Christie's Biscuits

The Standard of Quality Since 1853

National Radio Chain

Broadcasting Companies To Improve Quality Of Radio Programs

A national chain broadcast organization, divided into two sections, will commence operation about September 1, it was announced in Toronto, by R. W. Ashcroft, who has been appointed manager of the newly formed Trans-Canada Broadcast Company.

Mr. Ashcroft said the organization of the company was the outcome of a suggestion by P. J. A. Cardin, minister of marine and fisheries, that an effort be made by Canadian broadcasting companies to improve the quality of domestic radio programs.

Key stations of the new organization will be located in Winnipeg and Toronto.

Stations in Montreal, Ottawa, Kingston, Hamilton, London and Quebec, will be linked up with the eastern section and stations in Saskatoon, Regina, Edmonton, Lethbridge and Vancouver with the western section.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Volcano Creates Havoc

Thousand Deaths Reported On Island Of Dutch East Indies

According to reports transmitted by a resident of Timor, nearly the entire island of Paloeweh, in Dutch East Indies, has been destroyed by fire from the eruptions of a volcano. Six villages were destroyed by fire. The death toll was believed to be nearly a thousand.

Six hundred persons were injured when hit by fragments thrown out of the crater. Further casualties were caused by the submersion of the whole seaboard of the island through an earthquake accompanying the eruption.

The remainder of the islanders, numbering 5,000, were stated to be safe and ample provisions available. It was feared that nine native boats foundered with their crews.

Open New Hotel At Waterton

First class accommodation for visitors is now available in Waterton Lakes National Park, Alberta, with the opening of the new Prince of Wales hotel.

Landlady (letting room): "Of course, I expect the rent punctually every week."

New Lodger: "Just so, madam. My rule is either punctually or not at all."

Music produced in Australia was recently heard over the radio by passengers travelling on a railway train in England.

Canada's field crops value, 1927, was $1,134,192,000, including $439,340,000 for 444,000,000 bushels of wheat.

Charity covers a multitude of sins that should be allowed to remain uncovered.

The bone commonly called the kneecap is known as the patella.

VERY HARD RED PIMPLES ON FACE

Was Terribly Disfigured. Healed by Cuticura.

"My trouble began with small pimples breaking out all over my face. They were very hard and red and scaled over. The pimples burned, especially when I rubbed them, and my face was terribly disfigured. The trouble lasted over a period of six months.

"I used several well-known remedies without success. I decided to try Cuticura Soap and Ointment so purchased some, and after using two boxes of Cuticura Ointment along with the Cuticura Soap, I am grateful to say that I am completely healed." (Signed) Eldred Clark, Box 87, Mountain, Ont.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Try Cuticura Shaving Stick 25c.

Life In the British Navy

H.M.S. Nelson Supplies Comforts Of a First Class Hotel

H.M.S. Nelson, the newest addition to the British Navy, is equipped with a soda fountain. Aside from the armament, she has many other points of interest which would surprise the tars who sailed the Seven Seas a hundred years ago.

In her domestic arrangements the Nelson sets a new standard. When going to sea she takes along 1,600 gallons of rum; 156,000 pounds of flour; 42,000 pounds of sugar; 7,000 pounds of tea; 43,000 tins of condensed milk; 20,000 pounds of frozen meat; 40,000 pounds of vegetables; 5,000 pounds of tobacco, and 10,000 pounds of soap. In addition she carries large quantities of fresh meat and other consumable stores.

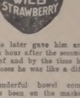

The catering department of the Nelson is equal in its equipment and organization to that of a first-class hotel. The men's meals are prepared by a staff of expert cooks in kitchens that have all sorts of modern electrical appliances. In the bakery all the work is done by machinery and the food is not handled.

The mess decks where the crew live are lighted by scuttles instead of artificial light which is used in most warships. Every section of the crew has its own bathrooms.

There are comfortable recreation rooms supplied with papers and magazines for the use of the men who are off duty and there is a well-stocked general shop at which the men can buy whatever they need. Moving picture entertainments are provided for them and there is a fairly large chapel.

DIARRHŒA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhœa and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Dutch Settlers May Come

Manitoba Deputy Minister Of Agriculture Returns From Visit To Holland

The Dutch people are intensely interested in Canada, and their government is anxious to have their surplus populatioon settle in Canada," according to J. H. Evans, deputy minister of agriculture in Manitoba, who returned from Europe recently, after representing Manitoba at the world's dairy conference in London.

Mr. Evans went over with several missions, the two principal of which were to attend the dairy conference and to confer with the Dutch government and their emigration representatives. He was greatly impressed by the favorable attitude shown towards Canada, and he thought that in the future Canada could expect to receive a substantial number of Dutch settlers.

As deputy minister of agriculture Mr. Evans took particular interest in the progress made in the dairy industry overseas and he said he had gained considerable knowledge in this direction which he felt sure would be of assistance to his province.

Voliva, who believes the world is flat, says Nobile just slipped over the edge. But what becomes of one when that happens?

Air in Holland tunnel, connecting New York and New Jersey, is changed forty-two times an hour by blower fans.

The value of the production of the fisheries of Canada for the year 1927, was $49,460,600.

Minard's Liniment—a reliable first aid.

PROHIBITION IN U.S.

Twenty-One Wet "Fallacies" Answered By Director Of Anti-Saloon League

"The opponents of prohibition rely upon continuous repetition of a series of fallacies and sophistries," says Ernest H. Cherrington, director of the Anti-Saloon League of America, in an article "Answers to Favorite Wet Argument," in the August Current History. He denies the truth of twenty-one of these favorite arguments, among which the following may be cited; "A minority put prohibition over; prohibition took away personal liberty; enforcement laws are unconstitutional; the demand for liquor makes the law unenforceable; there is a wet majority today and a revolution against prohibition; arrests for drunkenness have increased under the new law; modification of the law would promote sobriety.

"No fewer than twenty-five States had adopted prohibition by referendum vote prior to prohibition," Mr. Cherrington points out. As to the "personal liberty and constitutionality pleas" he cites the decision of the Supreme Court that prohibition in no way impaired the constitutional rights or liberties of any citizen. Regarding the argument that the demand for liquor makes the law unenforceable, he points out that this demand has always been artificially stimulated by the brewers and distillers: "The liquor traffic is unlike legitimate business in that the supply seems to precede the demand." As proof of this he cites the "activity of the beer booster and the whisky dealers of the old days" in sending agents to the non-license territories to sell liquor allowed only in the licensed regions.

"No wet majority exists today," declares Mr. Cherrington. The seven States listed by the wets as favorable to the liquor traffic later reversed their legislation on this subject, he points out; nor can the States which had laws against manufacture and sale of liquor, but none against the importation for private use, be claimed by the wets, for "no State has power to interfere with interstate commerce." He cites the estimate of Judge William M. Gemmel, "probably the greatest authority on crime in America," that "our annual arrests for drunkenness today are about 300,000 fewer than in the average license year."

Export Trade With Germany

Canada's export trade with Germany will be greatly increased under favorable treaty agreements which the Dominion is now endeavoring to establish with that country, according to Mr. B. Palmer, newly appointed Assistant Canadian Trade Commissioner at Hamburg.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Knew His Subjects

Two colored men came to the outside of a crowd where a politician was making a speech. "Who am dat man, Sam?" asked one. "Ah doan' know what his name is," Sam replied, "but he sure do recommen' hisself mos' highly. — Vancouver Province.

Larkes: "But think of the old days, the galley slaves, for instance."

Sparkes: "Well, all they had to do was row a boat and they had plenty of help, too."

DRESSMAKING SCHOOL
A practical training in designing and making costumes and millinery; individual instruction. The Winnipeg Dressmaking and Millinery School, 78 Donald St., Winnipeg. Established 1900.

Fur Farming Very Soon To Be A Recognized And Established Western Canadian Industry

Authorities make the prediction that within the next quarter of a century fur farming will be a stabilized industry in Western Canada, accepted and recognized as one of the many phases of agriculture in that territory instead of as a somewhat novel, extraneous activity. The trend in that direction is unmistakable. Farming settlement is extending northward, and, with scientific development having added considerably to the dominion of the plow, the tendency to raise furs intensively and domestically will inevitably become more accentuated, and fur farming takes its place alongside the other established activities of that territory. And because this area is by reason of its climate and other conditions capable of producing superior peltry it need fear no rivalry from other countries where the pursuit is similarly developing.

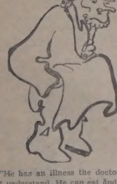

Many branches of fur farming have become soundly established in Western Canada to the extent they have got past the stage of foundation, and are exporting live animals abroad. One of the branches which has received relatively little attention, but which is promised a meteoric development, is that of muskrat and beaver farming, particular the former. From a position of virtual insignificance in the fur trade this little animal has attained a place of outstanding importance by reason of his pelt's multiplicity of uses. The security of the future of the muskrat industry is held to be the readiness with which the pelt of this little animal can be adapted to imitate the rarer and more valuable peltry. His position is secure as far as can be seen into the future. And while this industry is established in other parts of the Dominion it promises to be one which Western Canada is going to make peculiarly its own.

According to all reports a veritable army of men in the Prairie provinces has been awaiting the completion of arrangements for the transfer of the marshlands and other suitable tracts from the Federal Government to the provinces. There are stated to be 800 applicants waiting in Alberta and hundreds in Saskatchewan and Manitoba. According to announcement these lands are to be leased for fur-farming purposes at 25 cents per acre for three years and $1 per acre for each successive year. There is every indication of wholesale establishment to take place as soon as filing is open.

British Columbia is not lagging behind her prairie sisters, having long since securely established this industry, which is thriving in several suitable sections, and in which is to be found the world's largest establishment of this nature. The Columbia-Kootenay Valley has come particularly to the fore in this regard and many individuals from adjoining States of the Union have in the past few years moved up to follow the pursuit there. A further addition to such ranches was recently made when a group of Kelowna business men secured a large holding of bottom land from the Columbia Valley Ranches Limited, on the Kootenay Central Branch of the Canadian Pacific Railway, for the purpose of entering upon beaver and muskrat ranching on a large scale. This follows upon three similar fur-farming enterprises to establish in this section.

The industry is one which appeals from many points of view. The land so utilized is largely waste, and unproductive. Operation is economical and to achieve success does not necessitate any great experience or amount of technical knowledge. The increasing demand for muskrat has elevated prices considerably. These are now fairly stabilized, in the opinion of authorities, who are confident of the industry's ability to produce in the future. The average value of all muskrat sold in Canada at the time of the Government's last fur return was $1.54, while at recent Montreal sales as high as $2.70 per pelt has been secured. Ranch-bred pelts naturally bring higher prices, and since large-scale operation is the essence of the muskrat industry it is not difficult to realize the profit which can be made.

Muskrat farming is to become an additional source of revenue in Western Canada from its pursuit as a sole occupation or as a phase of mixed farming. The acquisition of furs in Western Canada has always proved a welcome and convenient means of adding to the year's profits, and this continues even in long settled and established districts, since certain valued fur-bearers tend to increase with settlement. A new industry conferring a double benefit came into existence in Western Canada when it was found that owing to newly discovered tanning processes the native rabbit, which exists there in thousands, could be profitably disposed of. In the past winter one Winnipeg firm alone handled more than 1,500,000 wild rabbit skins, paying for them an average of 10 cents apiece. Furs taken in Western Canada today have an annual value of between $6,000,000 and $7,000,000 and the attention being paid to fur farming should have the effect of augmenting this figure.

"He has an illness the doctor does not understand. He can eat and drink as well as ever—but he cannot work. I don't call that an illness, I call it a gift from Heaven."—Sondagsnisse-Strix, Stockholm.

Canadian Hospitality

New Resident From Old Land Pays Tribute To Kindness Of Canadian People

When he was in the city as a guest of the Chamber of Commerce the other day, Mr. J. W. Chadwick, deputy town clerk at Barrow-on-Furness, England, said: "It is my first visit to Canada, and I assure you my impressions have been very good, especially with respect to the sociability and kindness of the Canadian people."

In an Old Country newspaper there appeared recently a letter from Mr. R. H. Hodgson, two years out from England, now a farmer near Manville, Alberta, who said this in part: "We have done fairly well this year; it was our first crop. We had thirty-five acres of wheat in, and we got 1,079 bushels off it, so if we do as well this year we are not afraid of getting on. We were well done to by the Canadians when we got here. When we arrived at Manville it was four o'clock in the morning and we were met by four gentlemen who took us to a big hall. It was lovely and warm. There were beds for us and a box of provisions for us, and we stayed in this hall until the next day, for our baggage did not arrive until then. We were then taken to our new home, nine miles out of Manville. We had a new house and new barn for our cattle, and the neighbors near us had the fires on when we arrived. Everyone out here is so friendly."

Tributes to Canadian hospitality and friendliness, of course, are unstintingly paid by most people who visit the Dominion. It is refreshing to read them, moreover, if only to contrast them with the impressions of the Bishop of London—who recently said that he had failed to find an enthusiastic welcome for a Britisher in any part of the Empire.—Victoria Times.

Eat Onions

Have a Certain Medicinal Value For Various Complaints

If you like onions eat them, notwithstanding the obnoxious odor, for they are a veritable nerve tonic. They are excellent in liver complaints, they are valuable in clearing the complexion and they have medicinal value in various affections. You can prevent the annoying odor if you eat half a dozen sprigs of celery dipped in salt after eating the onions. A glass of milk is a good preventive, so are coffee beans or a swallow of uncooked coffee ground. Some persons prefer sucking a slice of lemon, then drinking a glass of cold water. If you are in the habit of drinking your coffee you will need no other preventive.

Park Animals Are Fearless

Wild life conservation measures adopted and enforced in the National Parks of Canada, have resulted in the wild creatures losing much of their fear of man. It is no uncommon occurrence to encounter wild deer on the streets of Banff townsite, in Rocky Mountains Park, Alberta, while Rocky Mountain sheep graze alongside certain sections of the park highways, undisturbed by the passing motor traffic.

Uncle Ed—Well, Johnny, how do you spell giraffe?

Johnny—G-i-r-a-f-e.

Uncle—The dictionary spells it with two f's.

Johnny—Well, you asked me how I spelled, Uncle.

Uncle Ezra: "So your boy graduated from the Agricultural College, eh? I suppose he's doing the planting and raising now."

Uncle Eben: "Yep, he's planted his feet on the table and is raising a moustache!"

All the world seems to be longing for peace. In fact, some nations are ready to fight for it.

Some men look for happiness with a lantern when the sun is shining.

THE NORTH-WEST PASSAGE

Hudson's Bay Company Will Use Route Long Sought By Early Navigators

Of exceptional, indeed historic, interest is the announcement made by the Hudson's Bay Company that it proposes and is preparing to use the North-West Passage, so long sought by the early navigators, for commercial purposes. This decision, however, comes two centuries and a half too late to give the members of that time of the "Company of Adventurers of England trading into Hudson's Bay" the thrill of knowing that their opinion on its feasibility had been confirmed. Only within the last two years did the company embark on the work of making preliminary surveys, and this year a small vessel was equipped for exploration purposes in connection with an overland expedition from Wager Inlet to Cockburn Bay. If these two expeditions lead to the accumulation of information supporting the plan, the company will be able to direct its trade with most of the western Arctic through an all-Canadian route, rather than through the present route from Vancouver around the dangerous Alaskan coast. Most of the District of Franklin would be easily accessible once Lancaster Sound and Barrow Strait were found practicable for commercial navigation.

Nearly every place name in this part of the world recalls the long struggle to discover and navigate the Northwest Passage—Cape Kellett, McClintock Channel, Franklin Strait, Ross Welcome, Cape Parry and Davis Strait. Since John Cabot sailed from England in 1498 a succession of adventurers have sought the fabled passage to Cathay and the riches of the East. Corte-Real, Frobisher, John Davis, Hudson, Sir Thomas Button, William Baffin, Parry, Sir John Franklin, McClure—all had their part in the aggregate of accomplishment. But of them all, Davis, Baffin and Parry contributed most. Sir John Franklin's disastrous failure by an ironical twist led to greater activity and to greater accomplishments than the three centuries before it could show. As a result of the search for Franklin and his party more than 7,000 miles of coast line were explored and McClure became the first to make the Northwest Passage. If the Hudson's Bay Company succeeds in making the Northwest Passage an avenue of communication, it may not be doing exactly what the Company of Adventurers sought to do in 1670. But it will be demonstrating that the enterprise and courage of a whole dynasty of explorers have not lost their power to make themselves felt in the world even now.

Cost Of Driving a Car

Average Cost For Maintenance and Depreciation Placed At a Dollar a Day

According to figures compiled by the American Motorists' Association, the average automobile cost the average American motorist $1 a day in 1927. The operation and maintenance cost each motorist $229, while the depreciation is based on the seven-year life expectancy of a passenger automobile and the average retail price of $953 for the year. Fuel and lubricants represent 44 per cent. of the operation bill, or $101. The mechanics charged $47 for their time, while replacement parts totaled $41 and the tire bill was $40.

British Boys Arrive

Party Of Young Men To Study Farming Methods In Prince Albert District

Eleven British boys and young men, part of a group of 100 immigrants from the old country, landed in Prince Albert recently, and were taken in charge by the land settlement board to be placed on farms in the district.

The settlement board will keep a record of each man for the next five years. They are all well equipped, and have completed a course of instruction in England at either the Brandon or Claydon farm colleges with a view to settlement on farms in Western Canada.

To Get $350,000 For Memoirs

Lord Balfour, who has just celebrated his 80th birthday, is writing his memoirs for which, it is said, he will receive $350,000. The work, which will be in two volumes and which will cover more than a half century of his public life, has been delayed until recently by his illness of last winter.

The way prices are today says the Kitchener Record, about the only time that a person has occasion to ask for change for a quarter is on Sunday morning.

The longest sleep on record was that of a Fernch woman, the "sleeper of Themelles," for seventeen years. It was caused by mental shock.

A wasp's sting is said to measure only one-fiftieth of an inch in length, but it's quality, not quantity, that counts.

There is no better green food than cabbage, while a herring supplies as much body building food as the same weight of salmon.

Canada's Helium Waste

Estimated That a Million Dollars' Worth Is Wasted In Alberta Each Year

Although the United States has not actually concerned itself with the possibilities of dirigibles, its government has not been lax in its pursuit of that elusive gas, helium. Ever since the war it has maintained a plant at Fort Worth and prided itself on being the only country in the world with an assured supply of that invaluable and safe lifting medium. Of late, however, the Fort Worth source has given indications of approaching exhaustion, and the Vancouver Province recently carried a news item to the effect that the Washington authorities are now turning their attention to the wells at Amarillo, Texas, where a plant is being established at a cost of $1,500,000 for the purpose of isolating the precious gas. Helium has been found to be a constituent of the natural gas yielded by certain of the oil and gas fields of the continent. Although heavier than hydrogen, it still has considerable lifting power and has the further great advantage of being non-inflammable. Because of this negative property, the presence of helium adds nothing to the heating or illuminating value of the natural gas, which loses nothing when the helium is removed.

Helium, because of its comparative rarity, is costly to procure, about $150,000 worth being required to float a dirigible of the size of the Shenandoah that came to grief a few years ago. This scarcity is prompting the United States authorities to secure a supply whenever and wherever it can be located. Canada was stimulated to similar endeavors during the war, but Ottawa's interest faded after the armistice, and the work of exploration and extraction ceased. This was doubly unfortunate both because of the waste of a valubale element and because the Alberta oil fields are the only known source of a helium supply within the British Empire. The gases emitted in Bow Island region are known to contain three-tenths of one per cent. of helium, and in the Calgary district alone a million dollars' worth is understood to be wasted each year. Just how much may pass away unredeemed in the northern and southern fields has never been ascertained. Little wonder that some years ago the Council of Scientific and Industrial Research censured this neglect as "unspeakably uneconomical," and urged that steps should be taken to extract and store the helium. Doubtless, with the expansion of gas production, the waste of helium has proportionately increased.

Apple Crop Is Promising

Twelve Per Cent. Better Crop Forecasted For This Year

The Dominion's Department of Agriculture forecasts a 12 per cent. better commercial apple crop this year than last. The estimate is 3,157,360 barrels as compared with 2,810,600 last year, and an average of 3,105,800 for the five year period, 1922-27. The increase is in the main attributable to the British Columbian crop which is estimated at 1,483,200 barrels, as compared with 1,079,500 barrels in 1927 and a five year average of 1,069,270 barrels.

Canada's Highest Officer

The highest official in British Columbia is the fire ranger occupying a lookout station on Mount Cartier in the Revelstoke District of British Columbia, 9,000 feet above sea level. Even in summer weather he obtains his water supply from snow. From his exalted station this ranger guards an area containing 130,000,000,000 feet of British Columbia timber.

Dad: How did you come out with your exams?

Son: Passed 'em just like they were cars ahead.

North America, with one-twelfth of the world's people, uses about one-half of all the timber consumed in the world.

Encourage Farm Study

Daughters Of Empire Will Give Bursaries To Quebec Students

To encourage the study of agriculture in the Province of Quebec, the Quebec provincial chapter of the Imperial Order Daughters of the Empire have decided to give two bursaries to students in agriculture, beginning with the academic year 1928-1929. Impartiality towards the two races has marked the arrangements as one of the bursaries is set apart for Macdonald College, while the other goes to the agricultural college at St. Anne de la Procatiere, which is entirely French. It has been stipulated that the bursaries, which are for $200 each, shall be awarded the students taking the highest marks in the final examinations of the second year of the degree course in agriculture. In both colleges there are short courses, but the scholarships of the I.O.D.E. are intended primarily to help students who wish to make a thorough study of the profession.

The Daughters of the Empire had found that very little was being done in Quebec to encourage the study of farming in an up-to-date and scientific manner, it was stated. As their policy is patriotic and educational, it seemed thoroughly fitting that the bursaries be given at the present time for agriculture, in order to show the interest of the Daughters of the Empire in all phases of their country's welfare.

Fall Ploughing Sod For Corn

Should Be Planned Soon As Possible After Removal Of Hay Crop

Sod land to be put into corn next year according to tests made at the Experimental Farm, Ottawa, should be ploughed as soon as possible after the hay crop has been removed. This is particularly recommended for weedy land, which should be worked frequently after the ploughing until late in October when it should again be ploughed and left rough over winter. According to the report of the Dominion Field Husbandman for 1927, published by the Department of Agriculture, Ottawa, this practice may not necessarily increase the yield of late fall over spring ploughing, but it lessens the work of weed eradication. While the second ploughing may in the case of light soil be left until spring when the weeds have been pretty well controlled, it is much better, under all conditions according to this report, in the case of clay soil to do the second ploughing in the autumn.

Tobacco Expert For Canada

Canadian Government Paying Special Attention To This Growing Industry

Nels T. Nelson, B.S.A., has been appointed to the position of Chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A. After graduating from the University of Wisconsin, he was appointed to the staff of that University and in 1919-20 worked on tobacco diseases under Dr. Johnson, a leading tobacco expert in the United States. From 1921 to 1923 Dr. Nelson was assistand in agronomy at the university, and for the past four years has given special attention to tobacco fertilizer, curing, improvement of varieties, etc.

The rapid increase in tobacco production in Canada, which has increased from 13,00,0000 pounds in 1921, to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

In racing a horse's age is reckoned from the January of the year in which it was born; thus a horse born in December, and actually not a month old the following January would officially be a year old.

The average time taken by blood to circulate from one arm to the other is 18 seconds. It makes the round trip three and a third times a minute.

The man who denies everything and asserts nothing is of no positive benefit to anybody.

AROUND THE WORLD IN RECORD TIME

John Henry Mears (left) and C. D. B. Collyer with their mascot achieved a new globe-girdling record by circling the world in 23 days, 15 hours and 8 seconds, five days less than the previous record.

Greatest Ranching Areas On The North American Continent Are To Be Found In The West

Political economists in the United States are now beginning to realize the importance of Canada's food producing possibilities. Not only is the home population continually increasing, but the extension of its cultivated land is gradually contracting the vast open spaces once available for free stock ranges. The recent drain on Canada's beef and dairy cattle to replenish the depleted United States herds is more likely to increase than diminish, judging from the estimates of the situation appearing in newspapers south of the line. In the last fiscal year Canada exported 289,021 head of cattle, worth $13,877,405, figures exceeded only in 1919, 1920 and 1921. A recent Canadian Pacific bulletin on ranching in Canada states that Canada's cattle have been moving across the border at prices which are returning to their producers the greatest profits ever received, and the prospect is that this situation will continue for some time. It goes on to point out that any possible surplus above United States requirements should find an outlet through the British Isles and, probably, Japan, the latter country having recently taken several shipments of Alberta cattle.

The bulletin has attracted attention in the United States, more particularly its statement that south of the main line of the railway, in the provinces of Saskatchewan and Alberta alone, are more than 5,000,000 acres of leased range land where giant herds of horses, cattle and sheep roam the prairies pasturing on the rich grasses as they did in the area's earliest stage of development, and where by reason of conditions they will probably always continue to do so. Within the railway belt of British Columbia are over 6,000,000 acres of leases, the number of leases and the area comprised steadily increasing. A direct impetus to the ranching industry was recently given by the Department of the Interior in an amendment, when it allowed the granting of 21-year leases.

This region has long been established as one of the greatest ranching areas on the North American continent, but it does not represent more than a relatively moderate proportion of the available country. Other sections of the Canadian West offer equal opportunities for raising of live stock on an extensive scale. Much interest is being taken in the Peace River tract of Northern Alberta and the valleys of the interior of British Columbia. In the vast region of the Peace River are large tracts of good grazing land suitable for ranching, the bright prospect facing the industry at the present time, enticing many to that territory. Again, in the interior of the Pacific coast province are excellent stretches of range country, capable of carrying great herds of live stock. The establishment of new enterprises and the importation of numerous animals are continually being reported, the bulletin announces.

Herman Trelle Scores Again

Wins More Honors At Grain Show Held At Regina

Herman Trelle, of Wembley, Peace River District, Alberta, who won the grand championship for both wheat and oats at the International Grain and Hay Show, in 1926, and the grand championship for oats and the reserve grand championship for wheat at the 1927 International Show recently won more high honors at the International Grain Show held in conjunction with the Regina Exhibition. Trelle's winning sample of wheat at Regina was of the Marquis variety, grown on his farm at Wembley, and weighed 68 pounds to the bushel. In the non-competitive exhibits at the Regina show, Trelle had on display a sample of what at present is termed his "Mystery" wheat, a variety which he is developing and believed to be a cross between the famous Marquis and a new variety known as Reward, which gives great promise not only for early maturing but for rust resisting, both discoveries of the Canadian Government Experimental Farm at Ottawa.

Herman Trelle is a native of Kendrick, Idaho, and came to Canada with his parents when a young boy. He is a graduate of the University of Alberta.

U.S. May Cut Tariff On Cattle

Hon. Vincent Massey Working In Interests Of Our Stock Raisers

Hon. Vincent Massey, Canadian Minister to Washington, has succeeded in inserting the thin end of the wedge which will open up discussion on the tariff, well-informed traders in Chicago believe.

Their belief centres around the fact that a committee of the United States Tariff Board is about to leave for western Canada to inquire into the cost of cattle production. It is stated that such research is always preliminary to serious consideration of tariff problems.

The theory of the tariff makers, it is pointed out, is that an import tariff must equal differences in cost of production between tariff levying and exporting countries.

Traders on the stock markets are of the opinion that the present tariff affords no protection to American cattle raisers and merely mulcts Canadian growers.

Taking Care Of Silo

Creosote Preparations Better Than Linseed Oil For Sealing Pores Of Wood

This is the season when stave silos go down. The staves shrink in the heat, and at the same time the iron hoops lengthen. Up comes a wind, and in goes the silo. There are two precautions to take. Tighten the lugs a little. These should be, although they often are not, so placed that they can easily be reached from the chute. And if there is time, paint the inside with linseed oil (half boiled, half raw) and the outside with ordinary paint. This seals the pores of the wood and prevents it from swelling and shrinking to such an extent. Creosote preparations are cheaper than the linseed oil, but may taint the silage.

Illustrated signs, showing where pedestrians may cross busy streets and motorists must give them right-of-way, is one suggestion for "safety first" being considered by the Paris police.

Mrs. Mosher—"One thing, my husband and I never do any quarreling at the breakfast table."

Mrs. Squasher—"That's right. I have seen your man eating his breakfast down street."

The automobile is said to be rapidly developing Western Australia.

"Is that bottle of rum your sole consolation?"

"Oh, no. I have two more in the cupboard!"—Pele Mele, Paris.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for *Bayer*. And don't take any but the tablets that are stamped with the "Bayer Cross."

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

WORLD HAPPENINGS BRIEFLY TOLD

Henry J. Wright, K.C., 66, prominent Toronto barrister, is dead.

Warnings will be posted throughout Alberta, Saskatchewan and the western portion of Manitoba, notifying unemployed after the harvest ,not to go to Vancouver in search of work.

One of the best known railway conductors in the west and for the last three years vice chairman of the Western Region, C.N.R., Order of Railway Conductors, Harry Sells Ostrander, 42, is dead at his home in Brandon.

The London Sketch says that Oscar Slater, whose conviction of murder was recently set aside after he had been imprisoned for years, has accepted the government's offer of £6,000 ($30,000) as compensation for his wrongful conviction.

Rev. Father James Huntin, former rector of St. Michael's, London. Ont., and St. Joseph's, Brantford, was killed when he wandered on the C.N.R. tracks near his home. He retired a few years ago and was in poor health.

Senator Dale, of Vermont, announced that President Coolidge had expressed his certainty that Herbert Hoover would be the next president of the United States. The Senator said that the chief executive had given expressioon to that view during a conversation.

Practical certainty that Charles Evans Hughes, of the United States, will be elected at the Septembr meeting of the League of Nations, a member of the Permanent Court of International Justice at The Hague came recently, when Italy and Poland joined the 26 nations who previously had nominanted him for the place.

The first appointment of its kind to be made in Canada is that recently made by which Miss Lillian Hollingshead, a graduate of the University of Saskatchewan, will become a member of the staff of the Dominion rust laboratory in Winnipeg, her duties to begin next Spring. Miss Hollingshead is now at the University of California.

F. W. Harris, of Birmingham, England, wrote to Mayor Norman, of Saskatoon, some time ago and asked his aid in locating a brother who had left England for Saskatchewan 15 years ago, and had not been heard of since. An item was inserted in the Star-Phonix and a reply was received from A. E. Harris, Dundurn, Sask.' who stated he was the long lost brother.

When a small boy isn't doing anything else he eats something.

The writer's train of thought is a construction train.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Having seen Impington Hall, once the home of Samuel Pepys, a three hours' run took us to Nottingham. En route were Huntingdon, the birthplace of Oliver Cromwell, Peterborough with its cathedral founded in 1118—here Catherine of Aragon was buried, and for some time the body of Mary, Queen of Scots, lay; Stamford, sacked by the Lancastrians in 1461; Oakham, where every traveller was required at one time to leave a horseshoe at the Castle, the earliest of the present collection being contributed by Queen Elizabeth; and Melton Mowbray, famous for its pork pies, Stilton cheese and fox hunting.

Our stay in Nottingham was for the night only. By 8.30 a.m. we were on our way to Newcastle, passing through Ollerton on the border of Sherwood Forest, of Robin Hood fame; Doncaster, of the races and butterscotch; Selby, with its Abbey built by William the Conqueror; York; Darlington, the birthplace of the modern railway, and Durham whose cathedral, one of the most dominantly situated in England, is acknowledged the grandest Norman cathedral in the country.

Lunch at York gave us opportunity to visit York Minster and to view the city walls. History is not merely evidenced but felt in York. Here died the Roman emperor Severus in the year 211. Here the son of Constantine the Great was proclaimed Emperor of Rome in 306. From their base in York the Romans conducted more than one campaign. In Saxon times York was a torchlight of Christianity. Last year York celebrated the 1300th anniversary of the founding of York Minster.

Amazement filled our minds as we entered this glorious building, lofty and more magnificently spacious than any cathedral we had seen from floor to roof 99 feet sheer; 102 feet in the choir. The east window, the second largst in the world, is 75 feet by 32 feet. The stained glass is the most perfect and extensive in Britain. The Chapter House is the most beautiful in England. It is believed that the pagan temple of Diana stood on the site of York Minster. Here the Saxon King Edwin embraced Christianity and in the crypt we saw the well from which he was baptized! How wonderful then that we should find within this venerable Minster the names of Canadian women! We found them on the oak panels below the "Five Sisters Window" which was recently restored, and unveiled by the Duchess of York to the memory of 1458 British women killed in the Great War. The Canadian names numbered 42.

One could not leave Yorkshire without a tribute to the excellence of its farming, the neatness and thriftiness that characterize this county of "broad acres." In this respect Yorkshire farming excelled anything we had seen.

Nowhere was it better seen than at the home of Mr. J. N. Strickland, Bainesse, Catterick, one of the most outstanding breeders of dual-purpose Shorthorns in England today. By his courtesy some thirty of our party were neabled to see his herd and enjoy the hospitality of his home. As we rode on north we passed through the historic ground where the Shorthorn breed had its beginnings, and it was interesting to see over Mr. Strickland's mantel the picture of one of his ancestors who sold cattle to Amos Cruickshank.

As we passed through Darlington, we stopped in the famous old market place, the scene of historic contests and animated discussions on the relative merits of the cattle of various old-time founders of the Shorthorn breed.

Newcastle, like Nottingham, was reached in the evening and left early in the morning, so we had not time to view this busy city. Suffice it to say that we were impressed by its activity and the signs on every hand of its industrial and maritime importance.

The journey towards the Scottish border was through beautiful and increasingly hilly country, becoming wilder and more magnificent as we approached the Cheviots. Then a stretch of wire running to the top of a sugar loaf hill and a board marked "SCOTLAND" told us that we had reached the Border. Cheers broke out as each char-a-banc crossed it—our salute to "Caledonia, stern and wild." Soon, however, the sterner beauties of the Cheviots gave place to a kindlier prospect. Hard to believe that we were passing through the battlefield of Chevy Chase where the forces of Hotspur fought the troops of Douglas by moonlight 540 years ago.

We lunched at Melrose which boasts in Melrose Abbey, the finest ruin in Scotland, founded by the Cistercians in 1150, but destroyed, rebuilt and extended at various times. The ruins are principally those of the 14th century. Near the High Altar, the heart of King Robert the Bruce, is said to have been buried.

We had now a solemn duty to perform, a sad tribute to pay. We had been shocked while in Denmark, to learn of the sudden death of Earl Haig. The funeral had taken place before our return to England, but Dryburgh Abbey was one of those places which we were to see en route to Edinburgh. What more natural than that we should wish to pay a tribute for ourselves and Canada at the last resting place of the great Field Marshal. We had brought with us a wreath of poppies, obtained from the British Legion, that body of ex-service men for whom the late Earl had done so much. It was late in the afternoon when we reached Dryburgh Abbey, and the setting sun was shining through the trees. In this sheltered spot, quiet as in the days when monks had meditated there, the world seemed far away. We felt the peace of Dryburgh enfold us as we formed up silently to march in procession to the simple grave. Mrs. Matheson carried the wreath. Reverently it was deposited, reverent we stood and lingered. We were still silent when we moved away. A high privilege had fallen to our lot, a deep experience.

(To Be Continued.)

It is always well to remember that foolish fear may double the danger.

Canada has the largest forest reserves in the Empire.

War On Crows

Saskatchewan's Crow Population Is Materially Reduced

Saskatchewan's crow population has been reduced by more than 50,000, and 154,159 eggs have been destroyed in the competition promoted by the provincial department of railways, labor and industries, according to the official returns up to the beginning of August. To date, 1,596 competitors have enrolled in the competition.

Competitors certificates account for 112,757 crows' legs, or 56,376 crows, and 154,159 crows eggs.

Anton Galgan, Dana, is leading with 146 eggs and 2,054 legs, for a total of 10,562 marks; Horace Cowling, Semans, is second with 1,239 eggs, and 1,380 legs, for a total of 9,418 marks, while Rudolph Leniczak, Neudorf, is third with 491 eggs, and 1,664 legs for a total of 9,302 marks.

Employer: "Rufus, you are too lazy. Don't you realize that hard labor is the most wonderful thing in the world?"

Rufus: "Is it? Den why does dey sentence fellows to it?"

Quinine is derived from the bark of the chinchona tree, a native of Peru, which was not grown in England until 1858, although its virtues had been known for over 200 years.

Users of push-bikes in the British Isles are now estimated to number six millions.

A FRIEND OF THE PRESS

F. E. TRAUTMAN

Press Representative, Canadian Pacific Railway

Newspaper editors and proprietors from the Great Lakes to the Pacific Coast, comprise quite a large fraternity, and to know each and every one individually means a fairly large acquaintanceship. Mr. F. E. Trautman, C.P.R. Press Representative, will possibly tell you that he has more than a nodding acquaintance with all the old-timers and most of the men who have more recently entered the newspaper field in Western Canada. Quite a few years have passed since Mr. Trautman quit the editorial chair of the Fort William Times-Journal, to enter the service of the Canadian Pacific Railway in his present capacity. During the intervening time he has cultivated and held the friendship of the newspaper men throughout Western Canada in particular and Eastern Canada as well. Mr. Trautman's outstanding characteristic is his geniality, and the whole-souled interest he has taken in the welfare of the press is proverbial.

He has been ever present at annual gatherings of the Manitoba, Saskatchewan, and Alberta weekly newspaper associations, and has contributed in his own way, and in a large measure to the success of these conventions.

Recipes For This Week

(By Betty Barclay)

NUT AND DATE BREAD

2 cups flour.
½ cup sugar.
1 teaspoon salt.
1½ cups graham flour.
4 teaspoons baking powder.
1¾ cups milk.
3 tablespoons melted butter.
2-3 cup nut meats.
1 cup dates, chopped.

Mix and sift together dry ingredients, add milk, butter, dates and nuts last. When well mixed, place in a well-buttered bread or loaf-cake pan. Let stand for 20 minutes. Bake in a moderate oven 45 minutes.

CREAM OF VEGETABLE SOUP

1-3 cup finely chopped pork or bacon.
1 medium diced onion.
1⅓ cups diced potato.
½ cup diced carrots.
1 medium green pepper chopped, or
1 tablespoon chopped parsley.
1 cup diced turnip.

Cook vegetables and pork until tender in just enough water to cover. Add this mixture of vegetables and water to 4 cups thin cream sauce (4 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season to taste and serve hot.

Vegetables may be browned with bacon or pork in a frying pan before boiling—this gives a different flavor.

This soup, together with whole wheat bread and butter and a simple dessert, is sufficient for a whole meal.

It's more than a problem in geometry to square the eternal triangle.

Radium is the most costly metal in the world.

THIRD WRIGLEY MARATHON

Only One Swimmer In West Has Entered the Big Swim

Surprising as it may seem, to date only one entry has been received by the Exhibition authorities for the Third Wrigley Marathon from Western Canada,—that of John Patrick Smythe, of Saskatoon, and sent in from Moose Jaw. However, John Patrick is an easterner, when it comes to swimming, as he long ago was a member of the Toronto Swimming Club, and learned most of his swimming there. He does'nt say where he does his training, but he will establish himself on the banks of Lake Ontario, a short week before the race.

Fred Crowe, of Fort William, is the next nearest approach to a western entry, who up to now will be a competitor. Fred should have no trouble in negotiating the southern waters of Lake Ontario, when it is considered that he has been navigating the Kaministiqua for three months in preparation for the big grind,—although Lake Ontario has not been warmer, than fifty degrees Fahrenheit for the past month.

Armenia is represented; Holland has three; Poland, one; Australia, two; Germany, four; Switzerland, two; France, four; England, two; Finland, three; Norway, two; South Africa, one; Dutch East Indies, one; Hawaii, one; Belgium, one; the United States and Eastern Canada sends scores,—yet the west has only one to "chance his arm."

Georges Michel is now in Canada, and in hard training near Quebec. Vierkoetter does his daily dozen in Humber Bay. George Young, after a vigorous scrap with his management in which he capitulated, is still at Port Credit, where he attracts many to his camp. "Flying Fish" Summers of California, is looked on as almost a sure thing this year. He has improved his stroke to a remarkable degree, now swimming a flutter kick that seems to add miles and miles to his speed, But mendell Burditt, former Winnipeg boy, a clerk in the Canadian National Railway head office, is not to be overlooked, and there are numerouse swim-wise fans who are loud in their praise of him. Others say he is overdoing it and may be too fine the day of the race. Four or five miles a day for weeks on end will reduce any swimmer to scrap in time.

The women's division increases in interest with the entry of Ethel Hertle, the best woman last year; Ethelda Bleibtrey, an American Olympic champion in 1924; Lucy Dimond, of marathon fame; Lottie Schoemmel, who invented the grease suit and others probably even better known whose names must, in confidence, not be mentioned until the last moment.

Need Hardy Pioneers

London Paper Says Canada a Country Mainly Fit For Heroes To Live In

Discussing the assertion credited to Ramsay MacDonald, in Quebec, to the effect that Canada wanted only the cream of immigrants, the London Evening News says editorially: "What fools the Canadians would be if they welcomed derelicts. We may pass over the fact that all of Canada save the fortunately well-populated section of lower Ontario and a strip of British Columbia coast is a country fit mainly for heroes to live in. Our Canadian brothers would not wish us to stress this aspect of migration too severely, but we must say without hurting sensitive feelings that the hardy Scot from the Orkneys or western isles has a better chance of becoming one of Canada's leading citizens than a product of some town slum.

"Canada's answer to MacDonald will be 'keep your derelicts, or better still, stop them becoming derelicts,'" the newspaper concludes.

First Money Grubber — "What, back already? You told me you were going to the country for the rest of your life."

Second—"Well, I've had it. Have not done a lick of work for two weeks."

When a man is generous to a fault it is usually to one of his own faults.

INTERNATIONAE GLOBE ROLLER

The "International Globe Roller," which is virtually a house on wheels, is travelling through Canada upon what its operator, Dr. George Miller, a Philadelphia veterinarian, intends to be a 250,000-mile tour of most of the principal countries of the world. The motor caravan started on July 4 with a trip to Washington, D.C., and Dr. Miller now plans to head through the Canadian west and on to Alaska. From there he expects to follow the Pacific coast route to South America. In the illustration Dr. Miller is seen with his wife in one picture, while in the other they and their three mechanics are standing in front of the "Roller," which contains two bedrooms with stationary double beds, a well-equipped kitchen, electric lighting, a radio set, etc.

SUNDAY SCHOOL LESSON

AUGUST 19

PAUL CARRIES THE GOSPEL INTO EUROPE

Golden Text: "Come over into Macedonia, and help us."—Acts 16.9.

Lesson: Acts 15.36; 16.15.

Devotional Reading: Isaiah 60.1-6.

Explanations and Comments

The Macedonian Call, verses 9, 10.—Paul was at Troas, the gateway to Europe. As he walked the streets he saw a motley crowd, among them many Europeans. As he stood in the harbor and gazed out at the distant islands fringing the coast of Macedonia, he must have longed to go over and possess that part of the world for Christ. It was a natural vision which appeared to Paul that night, of a man of Macedonia standing before him and begging him to "Come over into Macedonia and help us." "There was that mighty power which has been called 'the urge of God' acting upon a soul ready to obey the divine behest to the uttermost."

"How came the vision to take this shape—a man standing beseeching him? Perhaps because an active imagination tends always to personify human need. Phillips Brooks once confided to a friend that sometimes, as he preached in Trinity Church, the multitude of faces in the congregation, expressing their multitudinous hunger and yearning, would suddenly melt into a composite face, all the people becoming for the moment a single person whose vast need moved the preacher profoundly, and to whom he poured out his secret soul in impassioned utterance. It may have been thus with Paul and the Macedonians. His eager yearning to help would not permit him to think of them impersonally as a collection of individuals, but only as a composite personality whose need was so acute that a way must be found to help them. I think the success of the missionary enterprise always will depend upon the power of Christians to visualize and personalize the need of non-Christians in this way."—James A. Beebe.

"I am confident that when the Almighty wants me to do, or not to do, a particular thing, he finds a way of letting me know."—Lincoln.

God was bidding him preach in Macedonia, Paul believed, and "straightway" he made his plans to obey his orders.

Very few old men, W. Robertson Nicoll thinks, look back with regret upon the decisions that they made at the crises of their careers, and the reason is, he says, that we are not left so much to our own wisdom as we think. All unconsciously to ourselves we have been guided.

Golf Accidents

Surprisingly Few Accidents Considering the Element Of Risk

A story recently told of a Chicago man receiving a severe head gash from a club wielded by a woman golfer on Belle Isle. It was an accident, of course.

When one considers the number of persons now engaged in the pasttime of golf and that there are many of goolf and that ther eare many public courses in parks—which means that spectators are continually passing over some section of the course —it is really remarkable that so few accidents happen. It is not a pleasant thing to be hit by a snappily-driven golf ball, much less to have one's head come in contact with a club swung full tilt in the direction of a ball.

There are, of course, more accidents on the golf courses than there should be. As in motor car driving, one finds the supremely careless person who takes not the slightest precaution to protect either himself or others about him. — Border Cities Star.

Would Remit Customs Duty

Grade Ewes and Pure Bred Rambouillet Rams From U.S. To Enter Free For Certain Period

An order-in-council has been passed providing for the remission of customs duty on grade ewes and pure-bred unregistered Rambouillet rams imported from the United States during the period commencing September 1st and ending November 30th. These sheep are imported for breeding purposes, and must conform to all regulations as to health and be subject to all quarantine orders. The supply of these classes of sheep in Canada is not sufficient to meet the demand, and a large quantity is available in the United States for export. Similar action has been taken during the past few years on recommendation of the Minister of Agriculture.

Coals To Newcastle

Modern Counterpart Of Old Adage In Shipment Of Wheat To Russia

The old adage about shipping coals to Newcastle has a modern counterpart in the shipment of about $5,000,000 worth of Canadian wheat to Russia, which went forward from Montreal recently.

Before the war Canada's greatest competitor in the wheat markets of the world was Russia, but conditions have so changed that not only is Canada now the world's greatest wheat exporter, but she is actually shipping wheat to Russia. The shipments are said to be necessary to meet a threatened food shortage in Russia.

Peat Plant Will Operate

The peat plant at Alfred, Ontario, constructed during the season of 1927 by the Department of Mines is being operated on a commercial basis during the 1928 season. It is anticipated that an output of at least 15,000 tons of air-dried peat fuel will be made available for market.

Why is Red Rose Tea so fresh and flavory? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

1-W

Faith In The Wheat Pool

No Reason To Worry Over Possibility Of Falling Prices

Opponents of the Canadian Wheat Pool are already worrying over the predicament of the Pool when it faces a possible wheat crop of 500,000,000 bushels with a falling market. It is predicted that the organization will lose strength and may ultimately be unable to continue operations. That is a case of borrowing trouble which is not based on reason or experience.

The Pool may have been fortunate as well as skilful during the era of high prices of the past two or three years, but the drop of ten to twenty cents a bushel in recent weeks causes some concern to growers and dealers alike. The carry-over of 40,000,000 bushels for export is larger than usual, and when added to the huge crop now ripening will make a problem in selling for the next few months. It is hinted that the "orderly marketing" methods of the Pool have failed to get rid of the 1927 crop as rapidly as was desirable. It should be remembered, however, that last year's crop was late in ripening, and that continued rains further delayed threshing and selling. Inevitably a large portion of the harvest, which was well above the average, was left in the farmers' hands till spring.

Should wheat continue around $1.25 instead of $1.40, as of recent years, can the Pool hold its members? It is instructive on this point to quote the views of Mr. Harold S. Patton, in his book, "Grain Growers' Co-operation in Western Canada," in the Harvard University Economic Series. After an exhaustive review of the movements, Mr. Patton points out, regarding the various organizations which have embodied the co-operative spirit, that, "while changes in name and form of organization have not infrequently taken place in accordance with changing conditions and policies, the enterprises themselves have been perpetuated under farmer control. In each case, moreover, the transfer has represented a more or less significant development in co-operative organization and policy."

Pool marketing involves a principle which cannot easily be laid aside It is a modern popular development, and in the case of the Western farmers it is the outgrowth of a long and bitter experience, in which the farmers have had to fight their own battle against the aggressive methods of other groups. "Under the Pool system of non-profit operation and direct selling," Mr. Patton says, "the farmer is receiving, in effect, the competitive world price, less the actual cost of handling, transportation and selling. The advantage to producers lies not only in the direct return of that portion of marketing margins which constitutes the middleman's profit, but also in further reduction of marketing costs through the potential economics of large-scale, centralized selling."

The whole principle of co-operation has stimulated a new spirit among Western farmers, and there is no reason to expect that the system will be endangered by the problems of a year of heavy harvest. — Toronto Globe.

May Be French Minister

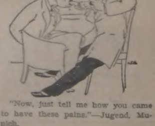

The official appointment of Hon. Phillipe Roy as Canadian minister to France is expected to be made shortly. The new Canadian Legation in Paris is to be opened in September, and Mr. Roy's promotion will be before that. A secretary to the Legation is to be appointed, and the staff reorganized.

He (after long argument) — "I wonder what would happen if you and I ever agreed on anything?"

She—"I'd be wrong."

Some men are unable to distinguish between good advice and a mild insult.

It would seem to be a poor newspaper article when you cannot make head or tail of it.

"Now, just tell me how you came to have these pains."—Jugend, Munich.

Ontario Government Makes Seizure Of Liquor From Export Houses

Windsor, Ont.—Seizing every liquor export dock from Belle River to Kingsville and placing their wet stocks aggregating several millions of dollars in value under police guard, the Ontario government has charged every exporter on the border with unlawful possession of liquor and ordered them to appear in court too answer the charges.

Firing broadsides of subpoenaes along the entire liquor front, provincial police squads, under the command of Inspector F. E. Elliott, of Toronto, served legal notice on 36 exporters of the attack on them by the Ontario liquor control board, the body through which the attorney-general's department is moving.

Conviction will mean a fine of $100 to $1,000 for each of the exporters or a jail sentence. Magistrates and judges may order jail terms in lieu of fines, if they wish. The huge stocks of liquors also are automatically confiscated to the government in the event of conviction.

Provincial police are checking their lists of 28 liquor export docks along the Detroit River, the operators of which were being served today with summonses to face liquor control act charges in police court presumably based on evidence found by liquor control board auditors in their check-up of exporters' books during the past month.

No indication of what had actually been discovered, however, was given and it appeared probable that this would not be revealed until th cases came to trial.

It was not expected that exporting to the dry United States would be effected meanwhile unless the present arrangement wherby liquor is loaded from freight cars to rum-runners boats without material delay.

Visits Constituency

Premier King Is Glad To Meet Supporters At Prince Albert

Prince Albert, Sask. — After an absence of two years, Rt. Hon. W. L. Mackenzie King arrived in the city which returned him to parliament as its member.

When the Premier stepped from his private car he was officially welcomed by Mayor Branion on behalf of the citizens.

Joining in the welcome were Dr. T. Robertson, president of the Prince Albert Federal Liberal Association; J. H. Lindsay, K.C., president of the Provincial Association; J. J. Flynn, president of the Young Liberals, and many prominent in the political life of the city and constituency.

An early complimentary lunch was tendered the Premier, following which the party left for Blaine Lake and Shellbrook. They returned in the evening and while tired the Premier stated that he had spent a very enjoyable day felt very happy in renewing many old associations.

A Message To Women

Miss Ishbel Macdonald Does Not Believe In Equality Of Sexes

Toronto.—Miss Ishbel Macdonald, when visiting here with her father, Right Hon. J. Ramsay Macdonald, Labor leader, issued a message to the women of Canada. It read:

"Women are coming into public life not to work against men, but to co-operate with them in improving public affairs. I do not believe in equality. Men and women cannot be compared. Women are just as important as men but they are not equal any more than A and B in the alphabet."

English School Girls Arrive

Will Make Educational Tour Of Canada From Coast To Coast

Montreal. — Twenty-five English school girls have arrived in Canada to begin a two months' trip arranged under the auspices of the Imperial Daughters of the Empire.

Their itinerary, which takes them to the maritime provinces, to Northern Ontario and Central Canada, the Rockies and the West, has been planned to give the girls a taste of the many phases of Canadian life. The party will return home on October 11.

Governor Appointed

London, Eng.—Sir Cecil Hunter Rodwell, formerly Governor and commander-in-chief of British Guiana, has been appointed governor of South Rhodesia, Africa.

Respect For Flag

Kingston, Ont.—Ontario branch Canadian Legion, in convention here, condemned the use of the Union Jack to drape desks at meetings, etc., and would have it used only as a flag.

Has Rank Of Colonel

Dublin.—Major James Fitzmaurice, member of the crew of the trans-Atlantic plane Bremen, has been promoted to the rank of colonel in the Free State Air Service.

Beothic Encounters Ice Pack

Unable To Reach Ellesmere Island Owing To Conditions

Four days of battering the great ice field lodged in Flager and Buchanan Bays failed to provide an opening for the approach of the steamship Beothic and the Canadian Arctic expedition to the post of Bache Peninsula on Ellesmere Island.

An ice pack, heavier and greater in extent than any other encountered on any previous voyage, cut off all the aprnaches by water to this farthest north post and as a result the expedition was forced to abandon their attempt to reach the detachment and landed the supplies and provisions at Fram Havon at the southeastern entrance to Buchanan Bay.

Word of the encounter with the heavy ice in and around Buchanan Bay was contained in wireless despatches received by the department of the interior. Members of the Royal Canadian Mounted Police detachment at Bache Peninsula, who had travelled across from the post to Rice Strait, took charge of the supplies when it was found necessary to unload at Fram Havan and with the aid of Eskimos and dog teams they will transport the material to the post.

After performing this duty the steamship Beothic was headed southward in Smith Sound. Five miles from Cape Sabine the ship again encountered very heavy ice and further progress seemed impossible. However, after a hard fight the vessel cleared the ice pack at noon on August 7. Two Eskimo families from Dundas Harbor post were landed at Nerk Settlement on the coast of Greenland about 50 miles south of Etah. These natives had been replaced by those brought north from Pond Inlet.

From Nerk the Beothic swung back across Smith Sound to the southern end of Ellesmere Island, where a visit was paid to the cache at Craig Harbor, which was reached on the evening of August 8. From this point the ship will continue southward to Dundas Harbor on Devon Island.

Takes Seat In Upper House

Bishop Of Salisbury Is Appointed After Long Wait

The appointment of Most Rev. Cosmo Lang as Archbishop of Canterbury and of Most Rev. William Temple to succeed him as Archbishop of York, leaves a vacancy in the Church of England's representation in the House of Lords, which will be filled by the Bishop of Salisbury, Rt. Rev. St. Clair Donaldson.

The archbishops of Canterbury and York and the bishops of London, Durham and Winchester occupy five seats in the House of Lords immediately on their appointment. Nineteen other bishops may succeed as a vacancy occurs according to seniority.

Bishop Temple already represents Manchester and will continue in the House of Lords as Archbishop of York. The Bishop of Salisbury, who has been "on the waiting list" since 1920, will take the vacancy. Whoever is appointed Bishop of Manchester will be at the bottom of the list of waiting bishops.

Will Not Oppose Joynson-Hicks

London, Eng.—The Anglo-Catholic committee is not running an official candidate in the constituency of Twickenham in the general election, an official of the committee states. He was commenting on reports that Sir William Joynson-Hicks, home secretary, who championed the cause of the evangelicals when the prayer-book controversy was up in the House of Commons, would be oposed by an Anglo-Catholic Independent Conservative.

Nobile Submits Report

Rome.—Premier Mussolini has received General Umberto Nobile, who presented to him his first report of the Italia disaster. The Italian premier, sometime ago informed the cabinet that a complete investigation would be made into all phases of the loss of the North Pole dirigible.

Vesuvius In Eruption

Naples, Italy.—The volcano Mount Vesuvius is in eruption, the clouds of smoke and lava being visible for 25 miles. A cordon of troops has been established about the base to keep tourists from the danger zone.

To Identify British Products

London. — "Empire marketing begins at home," inscribed on a Union Jack, is a feature of the national park designed for the furtherance of a government scheme for ensuring the identification of British products.

Bombs Thrown By Bandits

St. Paul, Minn.—Blinded by tear gas bombs thrown by bandits the driver and five guards of the Swceney Detective Bureau armored money car were robbed of $20,000 in currency here recently.

New Telephone Service

All-Canadian Phone Service Between Winnipeg and East Is Inaugurated

Winnipeg.—Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Fort William, officials of the Bell Telephone Company, the Canadian Pacific Railway and the Manitoba Government, recentely spoke to one another across 1,605 miles of copper wire.

The new line between Winnipeg and Montreal is approximately 1,605 miles, and is erected on Canadian Pacific telegraph pole line from Manitoba to Sudbury, via Port Arthur and Fort William; from Sudbury it connects to all eastern points by the Bell Telephone Company's lines. The weight of copper of the new line amounts to 350 tons. There are nine repeater stations to amplify the conversations. This is the third stage in the all-Canadian telephone route the first being Winnipeg to Alberta in 1922, the second Winnipeg to the head of the Lakes in 1924.

The fourth stage is now being compited across the Rockies, the Canadian Pacific right-of-way being largely used, construction now nearing completion for the coast-to-coast telephone service entirely within the Dominion.

Prince George Coming

Will Pass Through Canada To Join Ship At Vancouver

London, Eng. — Prince George, youngest son of the King, is leaving London at once to join H.M.S. Durban, in the West Indies station to which he was recently appointed as interpreter in French.

He will travel to Canada aboard the Empress of Australia, and will join his ship at Vancouver, B.C., toward the end of the month.

GREATEST CROP IN HISTORY IS THE PREDICTION

Winnipeg.—Western Canada is on the threshold of its 1928 harvesting season, with present prospects pointing to the production of the greatest crop in the history of the country.

Throughout the prairie provinces most encouraging progress is being made by all grains, and in districts where cutting has started, estimates of wheat yields have ranged from 25 to 40 bushels to the acre.

Recent reports from authorities making their annual field inspections have revealed the crops in varying stages with the most advanced having completed cutting, and in one instance threshed, while in the more backward areas another two weeks of favorable weather will be required to bring the crop to maturity.

The general condition, however, finds the 1928 crop slightly ahead of conditions at this date last year, and binders are expected to be humming over the western grain fields within a few days.

Cutting of barley, rye and oats, has been underway in some sections for the past week, with these crops yielding slightly above the ten-year average.

While no official estimates have yet been made of this year's wheat crop, the consensus of opinion of authorities who have travelled through the western provinces during the past week, is that final figures will show a crop of approximately 450,000,000 bushels.

The feature of the growing crop to date is its freedom from rust damage or other pest infection. Hail has taken a considerable toll, particularly in Saskatchewan, but the increased acreage seeded this spring is expected to offset this loss.

The first harvesters' excursion train is expected to reach Winnipeg from Eastern Canada this week. The railway companies also are moving thousands of grain cars to the various centres of movement.

Yet another indication of preparedness is the arrival of Leslie Boyd, chairman of the Board of Grain Commissioners, to make arrangements for the hearings on grain rates for interior elevators. These rates will be fixed by the board on the strength of the evidence submitted, and made public by Sept. 1.

COMES TO AMERICA

Hon. Mrs. Loel Guinness, one of the most beautiful of English aristocrats, is to take up residence in Pittsburgh, Pa., with her husband, who has been placed in charge of his father's business in that city. Before her marriage, a year ago, Mrs. Guinness was Hon. Joan Yarde-Buller, daughter of Lord and Lady Churston.

British Harvest Help

Satisfactory Arrangements Completed With the British Government

Ottawa. — Satisfactory arrangements have been completed with the British Government for the movement of harvest help from the British Isles to the wheat fields of Western Canada, according to a statement issued by the department of immigration and colonization.

This movement, which will begin at once, will be under the direction of the British Government, the Canadian National Railways and the Canadian Pacific Railway.

The two railways will be responsible for placing the men in harvest employment on their arrival from the Old Country and the Dominion Government and the Provincial governments will co-operate with the railways in placing these harvesters in winter farm employment in Canada after the rush of the harvest work is over.

Satisfactory arrangements have been made for the return fare of those harvesters for whom winter farm employment cannot be found.

Co-Operative Movement

Wholesale Society Expects To Establish 200 Stores In Saskatchewan

Saskatoon, Sask.—Referring to the recent announcement of the formation of the Saskatchewan Wholesale Society, which is being sponsored by the United Farmers of Canada to sell goods to consumers at as near cost as possible, W. Moss Thrasher, secretary, said that about 200 stores would be established within the first year.

Preference will be given to districts known to be favorable towards co-operative effort. Within the same period he hopes to see between 700 and 800 trading units founded so that the province will be fairly well covered.

Long Trek For Pension

St. John, N.B.—"Disabled soldier on way to Ottawa to fight for pension that was taken away," is the inscription on a placard which Joseph McIntosh, a returned soldier, wore across his shoulders as he left the city, on a long trek to the federal capital to seek renewal of his pension of $110.75 a month.

Unable To Visit Canada

Ottawa.—Information has reached the Government here that Lord Hailsham, who will act as Prime Minister of Great Britain in the absence of Rt. Hon. Stanley Baldwin, will not now come to Canada with the Empire Parliamentary Union, which is expected to arrive here the last week of August.

May Defer Old Age Pensions

Toronto, Ont.—Old age pensions may be deferred in Ontario for another year. Indications are that the survey ordered by Premier Ferguson will not be completed for the next session of the legislature, and so the bill may come up on the eve of the next election.

Air Express Inaugurated

Before the propellor stops whirling the Canadian Pacific Express truck is on its way to the city with parcels for delivery. A new air route gives bi-weekly express service in each direction between Toronto, Ottawa, Montreal and the steamship off Rimouski. Two days is gained over regular express schedules, western consignments being transferred to the Vancouver Express at Toronto.

French Plane Crashes

Maurice Drouhin, Noted French Aviator, Is Fatally Injured

Orly, France.—Another attempt to fly from Paris to New York ended in disaster before it had even begun.

The giant tri-motored "Rainbow" crashed on the landing field at Orly aerodrome, killing the mechanic, Lannet, fatally injuring the pilot, Maurice Drouhin, noted French flyer, and injuring two others, Gianoli and Manuel.

The big 'plane, designed by Rene Cousinet and built entirely of wood, so constructed that all of its essential machinery would be accessible during flight, was a complete wreck, parts of the wings, fuselage and wires being strewn for 1,600 yards along the field.

"The Rainbow" was being put through its final test preparatory to a start across the Atlantic this week when the accident occurred.

It was racing close to the ground at about 125 miles an hour when a few spectators noticed a huge wing wobbling. The engines were cut off them, but the deformation of the wing caused the giant 'plane to shoot almost perpendicularly into the air to a height of about 450 feet. There it slid to one side, apparently refusing to respond to the controls.

As it reached the ground it tore through a strong wire fence, knocked over iron posts, and crashed against the corner of a hangar, coming to a stop a crumpling wreck on the road bordering the field.

Italian Submarine Disaster

Twenty-Seven Of Crew Perish In the Tragedy

Rome.—Poisoned by acid fumes or drowned in the first rush of water, the crew of the Italian submarine F-14, sunk in a collisioon in the upper Adriatic, died to a man at their posts apparently with fortitude and resignation.

The stricken submarine was raised to the surface after 34 hours of desperate labor by divers who worked hour after hour to attach an air-pipe to the sunken vessel and to fasten steel cables in order that she might b lifted to the surface.

Twenty-seven perished in the tragedy. First reports received by the naval authorities indicated that there were 31 men aboard, but a check of the bodies today revealed that four of the crew had remained ashore for reasons which have not yet been ascertained. Included in the victims were two officers, Captain Well and Commander Fasulo.

Captain Well and Commander Fasulo were both at their posts of command in the conning-tower while the remaining members of the crew were all found dead at their stations. There were no visibl signs of panic aboard the boat.

Dies From Wounds

Stefan Raditch, Croatian Leader, Succumbs To Injuries

Vienna.—Stefan Raditch, Croatian peasant parliamentary leader, died recently at Zagreb, capital of Croatia. The city was grief-stricken and troops are everywhere ready to suppress trouble.

Raditch died of wounds received last June 20, in parliament, when a radical deputy, Punica Ratchitch, infuriated at frequent interruptions, whipped out his pistol and fired six shots into a group of Croatians.

Each shot claimed a victim, two being killed, one of them a nephew of Raditch, and four wounded.

For a time Stefan Raditch's condition improved but he suffered a relapse which finally brought about his death.

Since his assassination Croatia has been in a condition almost of martial law, with troops patrolling its cities' streets to quell possible peasant demonstrations occurring as a result of the episode.

EXTENSION OF PREFERENCE IS EXPECTED SOON

Ottawa.—The Citizen says: "A very important regulation vitally affecting British trade with Canada, is scheduled to go into effect this autumn, but just when this will be is for the government to decide.

"As a matter of policy it has been agreed to increase from 25 to 50 per cent. the requirement of Empire labor and materials in British importations in order to entitle them to the British preferential tariff, but before this is operative, customs regulations have to be devised and put into effect.

"As the idea originated with Hon. J. A. Robb, his return from abroad next week is awaited before regulations are considered.

"There have long been complaints about goods, very largely manufactured in foreign countries and then sent to Great Britain for the finishing touches and shipped from there as 'Made in England,' this being eligible for the British preferential tariff.

"The new exaction of fifty per cent. Empire labor and materials will not only rectify this, but will have a large influence on the importing trade in Canada."

Can See No Sign Of Decadence In The British Empire

Ontario Wheat Pool

Meets With Good Success After One Year's Operation

Chatham, Ont.—In one year of operation the Ontario Grain Pool has proven an outstanding success, and, according to present indications, greater things will be achieved in the next year. The farmers have been educated to realize the benefits of co-operative marketing, and they are getting solidly behind the pool movement in Ontario. These facts were brought out at a meeting here, when the pool's affairs, past and present, were discussed.

The speakers were Colin H. Burnell, Winnipeg, president of the Manitoba Wheat Pool, and H. A. Gilroy, Alvinston, president of the United Farmers of Ontario Co-Operative Company. David L. McCreary, Wallaceburg, Kent County representative on the Ontario pool directorate, acted as chairman, and at the close of the morning meeting was unanimously re-elected to the governing board of the pool.

Mr. Gilroy told of the remarkable progress made by the pool movement in Ontario in a year, during which time hundreds of five-year contracts had been signed. He was assured by observation throughout the grain-growing areas that the growers were becoming convinced of the soundness of co-operative marketing and would join the pool in greater numbers during the next twelve months.

Pilgrims At Ypres

Impressive Ceremony Is Held In Which 11,000 British Veterans Participated

Ypres, Belgium.—Eleven thousand British veterans of the Great War, including 3,000 women who served in various capacities during those four terrible years, gathered about Menin Gate on Aug. 8th for a solemn ceremony in commemoration of their comrades who fell in the desperately held Ypres salient.

Among them stood the Prince of Wales, Lady Haig, the widow of Britain's victorius commander; Admiral Jellicoe, president of the British Legion, who headed Britain's naval forces in the great struggle, and other commanders who bore a share in the battle of Ypres.

The pilgrims had come, some marching along the familiar roads and others by train, their numbers swelled by thousands who had gathered to witness the ceremony until it was estimated that nearly 20,000 men, women and children joined in singing the opening hymn, "O Valiant Hearts."

The service, in which the huge congregation participated, was beautifully simple and supremely impressive.

Leaves Big Fortune

London, Eng.—Capt. Alfred Loewenstein, the Belgian capitalist, who met his death by falling or jumping from an airplane over the English Channel the night of July 4, lost $60,000,000 in the three weeks preceding his death, according to the Evening News. This newspaper said it learns that Loewenstein left $40,000,000 to be equally divided between his wife and son.

Hickman Sentenced

Los Angeles.—William E. Hickman was sentenced to be hung at San Quentin penitentiary on October 19 next, for the slaying of Marian Parker. Judge Douglas Edmonds over-ruled nine defence objections before setting the second hanging date for the youthful kid-napper who slew the 12-year-old school girl here last December.

London, Eng.—"I am going back better pleased than ever that I am a British citizen," declared Premier G. Howard Ferguson, of Ontario, to the Canadian Press, before his departure for Canada.

Premier Ferguson has been in Britain and Europe studying migration possibilities, educational systems and agriculture since early in June.

"The man is a fool who says the old country is decadent," Premier Ferguson said.

"Like every other country in the war, England lost a generation of the brightest and most promising men who were on the threshold of business or public life. The still younger group who were then below military age are now coming on. The next ten years ought to be the most striking in the whole history of Empire development."

The premier said he found conditions in Scotland and Ireland greatly improved.

Speaking of agriculture in Britain, Premier Ferguson said that an all-round good crop meant ultimate prosperity.

"I can see a distinct advance everywhere in interest in overseas," the premier declared. "The pressure of the unemployment problem will bring of itself a greater consolidation of imperial sentiment and imperial forces generally."

Rich Gold Strike

Gold and Platinum Found In Northern Saskatchewan

Edmonton, Alberta.—Said to be incredibly rich in gold and platinum, a "strike" has been made along the north shore of Lake Athabasca, to the east of Black Bay, in the province of Saskatchewan, according to a statement made by Ed. Meyers, Fort Chipewyan trader, who is now in the city.

Jack Hersey, well-known northman, made the strike, following sporadic search for many years along the north shore of the lake, which has long been rumored to be rich in gold-bearing quartz.

Tests made at the University here disclose that some of the ore carries a content of precious minerals as high as 84 per cent., although this has not yet been confirmed.

According to another northerner, Charlie L'Argent, who makes one of the syndicate which is outfitting to head for the scene of the new find, one of the assays gave average returns of $45 per ton of some of the quartz shipped south from the scene of the find.

Storm-Swept Florida

Hurricane Creates Havoc Over a Wide Territory

Jacksonville, Fla.—After hammering at communities in the sparsely settled sections of East Central Florida, the tropical storm emerged to sweep Winter Haven and other towns in the rich central citrus country.

City officials at Winter Haven, approximately 50 miles east of Tampa, related that winds of 75 miles an hour velocity had followed earlier gales of 40-mile speed.

Grave fears are felt for the great citrus orchards, laden with fruit, in the immediate path of the storm.

Meanwhile reports trickling in from the country between the new storm front and the Atlantic told of half a dozen towns and communities visited by damage from the storm.

Buys New Plane

Dessau, Germany.—Charles A. Levine, first trans-Atlantic aeroplane passenger, has purchased a Junkers plane of the Bremen type for 100,000 marks (about $23,850) for delivery here next week.

Railways Making Great Preparations To Handle The Crop

Montreal.—Canadian railroads are completing plans for moving the 44,000 harvesters called from Eastern Canada to help harvest the expected record wheat crop in the West.

The Canadian Pacific started its first excursion from the Quebec district on August 14, and one from New Brunswick, August 10. The fare from stations in Ontario and Quebec is to be $15, and from points in New Brunswick, St. John, and west, $20 to Winnipeg, plus half a cent a mile beyond all points in Manitoba, Saskatchewan and Alberta, to and including Edmonton, Calgary and Macleod.

The harvesters are all destined to Winnipeg, whence special arrangements have been made for their speedy distribution to points in the West where they are most needed.

Return fares are st at $20 from Winnipeg to points in Ontario and Quebec, and $25 to New Brunswick, plus the half-cent-a-mile-rate to Winnipeg from points in the West.

The Canadian National will run its harvester excursions from August 9 to August 31. Special provision will be made for the care of families travelling on harvester excursions over the Canadian National System.

Preparations are practically completed by the railroads for movements of the new harvest. The Canadian Pacific has set aside more than 40,000 box cars for the movement, a much greater number than in any previous year. Seventy-nine great engines have been loaned by Eastern lines, 13 of these new locomotives being of the Mikado type with both superheater and feed water attachments.

Bins are clearing rapidly at the head of the Lakes. Grain carriers across the Lakes are moving east an average of 1,240,000 bushels a day.

Would Reclaim Sahara Desert

Plan To Create Inland Sea In Northern Africa

A plan to change the climate of Northern Africa by creating inland seas in the Sahara Desert is being seriously considered by the French government and the cabinet is expected to make a decision on the question in September.

Dwight Braman, of New York, is the engineer who presented the plan and undertook to raise $50,000,000 to further the project. He made an engineering study last spring of the arid wastes lying below the level of the Mediterranean and extending from the Gulf of Gabes westward to Biskra, and formulated plans to cut three ship canals forty feet deep and two hundred feet wide connecting the Mediterranean Sea at Gabes with three dry saline lake beds called "Schotts."

It is estimated that Mediterranean waters by means of these canals would permanently flood some 10,000 square miles reaching from Gabes westward. This would mean a water route of about 250 miles for seagoing ships through a part of Tunis and deep into Algeria.

The main purpose, however, is to affect climatic conditions and increase rainfall, which Braman undertakes to demonstrate, will be the result.

His scheme is based upon that of a commission of French engineers, chief of whom was M. de Lesseps, who in 1882 made a minute survey of the entire region.

Will Receive An Annuity

Widow Of Famous Scientist Remembered By Rockefeller Foundation

Madame Hideyo Noguchi, widow of one of the famous scientists of the Rockefeller Institute who lost their lives in the yellow fever research in Africa, will receive an annuity from the Rockefeller Foundation. Professor Oskar Klotz, of the University of Toronto is now engaged in the work in which Dr. Noguchi lost his life. Professor Klotz has made two trips to Africa in the world-wide effort to stamp out yellow fever.

According to information received here by the University of Toronto and the Toronto General Hospital, the Foundation Board of Trustees will meet in the fall and decide on the amount of the pension. The annuity is underwritten by an insurance company.

Dr. Noguchi's estate was fixed at $12,000 when his will was filed for probate. This was exclusive of the insurance, but the total amount was considered insufficient to provide for the widow.

Prosperous Toronto

Residents Pay More Income Tax Than Any Other City In Canada

Prosperity must have struck the City of Toronto in a great wave last year, for the Queen City paid nearly three millions more in income tax than in the previous year, the greatest increase of any city in the Dominion, not excepting even Montreal. Toronto's contribution to the Dominion's treasury was $13,448,545.

Of the other principal cities in the Dominion, twelve showed an increased income tax and seven a decrease. Some of the increase is due to the efficiency of the department of national revenue, and includes some of the arrears cleaned up under threat of prosecution.

Toronto's income tax collections for 1928-29 were—$13,448,545, an advance of $2,992,517 over the 1927-28 collections of $10,456,028. Montreal's 1928-29 collection of $16,195,033 was $2,732,754 ahead of the 1927-28 figure of $13,462,279.

Rocky Mountains Park

Rocky Mountains National Park, with headquarters at Banff, Alberta, is the oldest and second largest of our national parks. It has an area of 2,751 square miles and contains some of the finest recreational and scenic regions in the world.

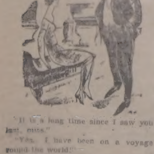

She: "We've been waiting a long time for that mother of mine."

He: "Hours, I should say."

She (rapturously): "Oh, George!"

A man likes to be called a brick, but refer to him as a lump of common clay and he gets mad.

Lack of variety in the food is bad for the digestion.

"It is a long time since I saw you last, miss."

"Yes. I have been on a voyage round the world."

"So have I. How strange that we did not meet."—Vikingen, Oslo.

DON'T TALK TO THE DRIVER

Good Advice Is Given To Those Who Go Motoring

Among all the "Don'ts" which we have heard in advice to motorists few are as simple and yet as effective as that in the homely radio talk by Mr. C. E. Hastings, consulting automotive engineer for both the Dominion and Provincial Governments. It was directed against what is known as the "back-seat" driver and the advice was not to listen to him. There can be no doubt that a great many accidents would have been avoided if the attention of the responsible driver had not been distracted by other occupants of the car. The remedy is of a two-fold character. The driver in almost all circumstances has enough to do to guide the car in safety and should not allow his attention to be distracted. No question of courtesy can be involved because the safety of all in the car depends upon strict attention to the business in hand. Many a driver seems to think that he is obliged to answer questions or comments by the other occupants, but any such obligation is strictly limited by consideration of safety. On the other hand the other occupants should bear in mind the responsibilities of the driver and should not bother him with needless questions or with idle talk. When they are resting at ease in a comfortable car there is a tendency to indulge in a small talk which is considered polite on social occasions, but this tendency should be checked.

Motoring, of course, is in its infancy and probably in time there will be evolved some code of good usage with regard to conversation. The first rule should be "don't talk to the driver." If the passengers would only follow this rule they would make it much easier for the driver and they would at the same time contribute to their own safety. Neglect to follow it should be considered contributory negligence in case of accident. The rule becomes the more necessary as the speed of the car increases. Even at the legal speed on the highway safety demands that the driver keep his eyes and thought on the road and his hand on the wheel ready for immediate action. The advice is intended for the great majority of motorists who have consideration for themselves as well as for others. If it is scorned by reckless "speed artists" they are comparatively few in number and may be expected to die an unnatural death.—Toronto Mail and Empire.

Canadian Farmer Has Advantage

Is In Enviable Position Compared To Agriculturists Across the Line

The Canadian farmer has a two-fold advantage over the wheat grower in the United States, says the St. Paul Pioneer Press. He has the natural benefits of a fresher soil, with consequently a prevailing higher type of wheat commanding more premiums on its milling value. He has a longer work day and more daylight. On the economic side the Canadian wheat raiser has cheap land, lower overhead and unit costs of production, and, what is of supreme importance, cheaper transportation.

If there is any lag in the American price behind that of Liverpool and Winnipeg, with prices falling here less rapidly than abroad, this year may see high grade Canadian wheat pouring over the border in spite of the tariff wall of 42 cents a bushel. This happens to some extent every year. Some of Canada's exceptionally fine wheat usually is able to pay the tariff to get the high premiums of the cash markets and still profit.

The growers of hard spring wheat in the Northwest, therefore, reap some benefit from the tariff in the exclusion of competing Canadian grades that might reduce cash premiums. But it is small wonder, when all the difficulties and handicaps of the American wheat grower are considered, that he is gradually turning to other crops.

New York Phone Directory

Four Million Copies Are Issued Each Year

Next to the Bible, New York telephone directories are the most widely circulated books in the world. Editions of the three sections in which the directory is published exceed 4,000,000. It's the biggest printing job in the country, if royalties were paid the "authors" they'd be made millioaires every year.

Like the Bible its greatest circulation rival, the New York phone directory has a world-wide circulation. Libraries, newspapers, business concerns and phone companies everywhere keep it on file. To persons other than subscribers it is sold for $1 a section.

Wilkinson was learning French, and one night, returning home after a dinner, he said to his wife, "Je t'adore." To his astonishment, she replied, "Shut it yourself!"

B.—Do you exercise before or after your bath in the morning?

C.—After. I usually step on the soap when I get out of the tub.

Time is money which some people are too stingy to want to spend even in jail.

A miser is known by the money he keeps.

Ancient Chateau Demolished

Ruins Of Thousand Year Old Castle In France Are Removed

Neither governmental nor individual funds could be obtained recently to save one of the most interesting monuments in central France—the chateau built by Thibaud III., King of Navarre, in 1199 for Queen Blanche.

The ruins of the chateau, located at Foujon, in the Aube Department, consisted of a stone tower with arched windows and a series of fortified walls. With this historical background they could have been transported to any country estate in Europe of the Americas at little expense. The windows and portals were in excellent condition, and there were several interesting inscriptions attesting the age of the edifice.

For several months the government waited for collectors to enter their bids for the premises, but none appeared on the scene. This caused considerable surprise as in the past the mere mention of a thousand-year-old building would have been sufficient to bring collectors and experts from all parts of the world. The French antiquarians made a final desperate attempt to save the ruins as a part of the nation's architectural patrimony, and the question was even discussed in the Chamber of Deputies.

Needing funds for other purposes, however, the Minister of Education and Fine Arts turned a deaf ear to all such proposals, and is said to have refused to authorize the opening of a publis subscription.

And one evening at twilight, the walls and turret which had survived the hottest conflicts of the Hundred Years' War, was sent tumbling to pieces by a tremendous charge of cheddite.

Nothing Pays Better

Education Is Greatest Asset To Success In Life

Does education pay? Surely, there is nothing which pays better. In these days of competition it is the one absolutely indispensable factor, without which success is practically impossible. But, apart from material considerations one can scarcely estimate the value of enlightenment to the community as a whole. Ignorance in one form or another is responsible for most of the woes of the world—the war against ignorance begun in schools and carried on through life is the mainspring of civilization. That country is the most civilized which gives its children the best chance of developing their moral and intellectual faculties. When such development has been adequately provided for, there need be little worry about other things. The schools are the very foundation of society.

The Cost Of Progress

Trees Four Thousand Years Old Are Cut Down To Build Bungalows

The giant redwoods of California are being cut down ruthlessly by lumber companies. The irony of it is that among the redwoods we are cutting down trees that are forty centuries old—to build bungalows, make railway ties and split into grapestakes—chiefly grapestakes. Any fool can make a grapestake; but "only God can make a tree." When a big tree falls with the boom of thunder, everybody knows that something lies prostrate that can never be replaced. A second growth may spring from the stump; but humanity is too impatient and avaricious to wait 4,000 years again.—Los Angeles Times.

Hard To Replace

Communities Should See That Old Industries Are Supported

It takes at least two new industries to replace in employing capacity one that has failed or moved elsewhere. Few new industries start on a large scale. The city that lets a long-established industry die for lack of help that could properly be given cannot ordinarily make up the economic loss, at least in a short time, by bringing in another industry to take the place of a defunct one. It is an almost literal translation of the old adage about the birds, the hand and the bush.—New York Sun.

Miss Dill—Don't think I'm as stupid as you are. I know a thing or two.

Mr. Hollownut—You know a thing or two? What, f'r instance?

Miss Dill—Well, you're one of them and then there are several more simps like you.

Nearly 1,000,000 pounds of potatoes are produced annually by convicts of six Canadian prisons and of this amount nearly two-thirds are grown on prison lands of Saskatchewan and Manitoba.

Mrs. Grogan:—It was was awful! Twinty-sivin Bolsheviks and one Irishman killed in the wreck!

Mrs. Callahan:—Indeed! The poor man!

She: "There are two things that prevent you from being a good dancer."

He: "What are they?"

She: "Your feet."

Canada grows between two and three million barrels of apples a year.

Canada has the greatest nickel deposits in the world.

Vitamines For Growing Chicks

Cod Liver Oil Is Recommended For Leg Weakness

Leg weakness has been a common disease of young chicks, but investigations of recent years have taught poultrymen how to avoid this trouble. If growing chicks get an abundance of direct sunlight they are not liable to contract this disease, but if housed for four or more weeks they are invariably subject to the trouble which may be prevented by special feeds that are known to be right in vitamines. Cod liver oil is now used in many poultry flocks and its virtue is believed to be due to its richness in vitamines. A pamphlet on the "Artificial Brooding of Chicks," prepared by the Dominion District Poultry Promoter and the Provincial Poultry Superintendent for New Brunswick and distributed by the Director of Publicity of the Department of Agriculture, at Ottawa, recommends the use of cod liver oil in amounts of one to two per cent. of the mash according to the degree of confinement. This, it is claimed, will prevent or even cure advanced cases of leg weakness. Egg yolks, and canned tomatoes are claimed by the authors to have a value in preventing leg weakness.

Other feeds rich in vitamines are yellow corn, green feeds, immature cut clover and alfalfa hay. These if used in an otherwise well balanced ration will give the flock the vitamines necessary for their well doing. The plan recommended for mixing the cod liver oil in the dry mash is to first mix the oil with bran until it is evenly saturated and then to mix the bran with the other ingredients of the mash. As the vitamine quality diminishes when mixed with the feed only sufficint mash should be mixed at a time to do the flock for three or four days.

Are Sun's Rays Declining

Scientists Say That Old Sol May Quit Any Day

Jupiter, the largest planet of the sun's family, is shooting enormous volcanic bombs into space, says a French astronomer. Some of the comets and fire balls that sometimes hit the earth may come from Jupiter.

Modern reflecting telescopes are capable of photographing three billion of the possible thirty billion stars in our universe system. Each is a sun, most of them larger and brighter than ours. They shed energy until burnt out.

It is said that our sun is perilously near the burnt-out stage. Any day it may totter. But since a day in the universe may be a million years, there is nothing to worry about.

Forest Fire Situation Improved

Season Of 1927 Was Unusually Favorable In Regard To Fires

Reports submitted by field officers of the Forest Service Department of the Interior, show the season of 1927 to have been unusually favorable in regard to forest fires. Six hundred and sixty-one fires occurred on Dominion lands in Alberta, Saskatchewan, and Manitoba, protected by the Forest Service during the season mentioned, as compared with 1,398 fires in 1926, 1,165 in 1925, and 1,487 fires in 1924. The area of merchantable timber burned over was 98,207 acres in 1927, as compared with 413,226 acres in 1926 (the worst fire season on record for many years), 126,970 acres in 1925, and 239,320 acres in 1924.

German Invents Film Paper

Paper films are the newest German invention. It is asserted they will revolutionize the picture industry. A Berlin engineer announces that after years of tests he has succeeded in manufacturing paper which is as susceptible to light as celluloid. It is not inflammable and is cheaper than celluloid film. The Schwerin studios say the invention is a complete success.

John: "I suppose you think I'm a perfect idiot?"

Molly (sweetly): "Oh, no; none of us is perfect!"

Italy has at least 70 privately owned railways.

Quilt From Bridal Costume

Interesting Memento Of 1823 Placed On View In Museum

Frugality and sentiment are joined in the story of a silk quilt made of squares of bridesmaids' dresses, placed on view in the Brooklyn Museum as a loan from Mrs. Therese Hallock Welsh, of Manhattan. It dates back to the Quaker wedding of Deborah Coggeshall, of New York and Elwood Walter, of Philadelphia, in 1823.

Bridal costumes in the 19th century were commonly regarded as made for a single wearing, disappearing from sight thereafter, in packings of tissue and lavender. On this occasion the mother and aunts of the bride persuaded the owners to surrender the garments in order that they might be converted into a quilt which the bride might cherish as a memento. Their faith that it would receive her tender care is justified by its present neat, unworn appearance.

The colors in the quilt include several shades of beige, or unbleached silk, several shades of greenish grays and a variety of light grays from pinkish to oyster white shades. A vase of flowers is the central motif. Three quilted borders surround it. The first is a design of grapes and leaves, the next an arrangement of feather scrolls and the third is of leaves.

The museum story of the quilt says much careful planning and many days of work must have been given to design and make it, and the bride held it through life as one of her most prized possessions.

Internal Parasites Of Swine

Sanitation Is Of Prime Importance In Dealing With This Pest

Unthriftiness in pigs is often due to infestation of internal parasites. In the latest edition of the bulletin "Swine Husbandry In Canada," of the Department of Agriculture, Ottawa, an article has been introduced from the pen of Dr. Lionel Stevenson of the Ontario Agricultural College, who in his opening sentence says "Why feed a worm-infested pig for ten or twelve months to get it up to market weight? Better swat the parasites; they have no market value, while bacon on the hoof has." Four parasites in particular are dealt with in his paper and clearly defined treatments are given for their control. Sanitation is of the utmost importance in intestinal parasite control. Clean stock if permitted to run in infested yards, pens and fields quickly become victims of parasites as well as distributors of parasite eggs. The extensive use of colony house and fresh ground for yards during the open season of the year is recommended for the keeping down of infestation.

The medicinal treatment recommended includes the use of such medicines as oil of chenopodium, Santonin, Benzine, and Areca nut, in doses that should be used for pigs of different ages.

Pig Is Stolen

Prize Porker Taken From Farm During Absence Of Owner

George Finnan, who farms 13 miles west of Saskatoon, a few miles from Grandora, had a pig. It was a fine docile porker, weighed 380 pounds, and would come to him whenever called. It was the prize pig of his drove. It encouraged the farmers for miles around to strive for bigger and better pigs.

Thieves broke in and stole the prize Berkshire of the Finnan flock. It happened during exhibition week, when Mr. and Mrs. Finnan and family were in the city viewing the horses and cattle at the Saskatoon fair, and thinking, as they walked through the pig barn, of their pig at home who could outweigh any on exhibit.

Mr. Finnan's neighbor, who lives across the road, saw a truck and heard the squeals of the prize porker. She thought, she said, that the big Berkshire had stretched his skin to capacity and was being slaughtered for market, and did not bother about it.

Angry Scot—Dae ye hear me? I've a complaint.

Postoffice Official — What's your complaint?

"The ink in here's sae thick that it clogs ma fountain pen."

She Stopped a Clock!

Joshua made history when he ordered the sun to stand still, but for no reason at all other than to please a little child, a captain of one of the Canadian Pacific "White Empresses" of the Pacific took time by the forelock and preserved Christmas Day for little Gloria Cosgrave, seven year old daughter of Colonel L. Moore Cosgrave, D.S.O., Canadian Trade Commissioner to Shanghai. At the age of two she was crossing the Pacific with her parents and it so happened that when the International Date Line was reached, the day threatened to be summarily wiped off the calendar was Christmas. The Captain, however, knowing there was a child aboard ordered the day to be preserved and the following one to be eliminated in its stand. A special tree and Santa Claus was arranged in mid-Pacific for Gloria's benefit.

She is shown here on board the Canadian Pacific Atlantic liner "Empress of Australia" on her way to England and in the midst of her second circuit of the globe.

A TITLED FARMER

Scion Of Noble Family Has Extensive Holdings In Alberta

Count De Topor, English economist and philanthropist, was among the cabin passengers sailing on the Cunarder, Ascania, for Europe recently. The count, who also possesses the title of Duke of Ossilini, is a cousin of the late Emperor Franz Josef, of Austria. His family has been prominent in Polish and Austrian history since the year 1010, one of the count's forebears being Count Maximilian, chancellor of Poland.

"I have no respect for titles," remarked the count, "but family matters make it essential that I should use mine. To my mind, the only thing of any account is the place in this world man creates by his own efforts."

Count De Topor has extensive interests in Canada. Mainly through his efforts the town of Vermilion, Alberta, has now extensive farm lands. He erected 40 houses there for farm workers and had a large plot of waste land turned into a nice park. Wooden sidewalks were replaced with cement ones. Farm workers are happy, and they have lived rent free on his farms. They have made such splendid progress, he said, that some of them saved as much as $10,000 in three years, and came to him wanting to buy property.

Count De Topor has extensive interests in the west and around Edmonton, which include nearly 60,000 acres of farm land.

"Farm land is cheaper in the Canadian west than anywhere else in the world," he remarked, "and the west holds a marvellous future for the ambitious farmer who is not afraid of a little hard work."

Count De Topor said he avoided anything to do with immigration of agriculturists into this country. He pointed out that his visit was private, though he was doing his best to further the claims of Canada as the coming agricultural nation of the world.

In addition to his philanthropic and economic interests, the count is a doctor and lawyer, though he does not practice.

"I find no time to practice," he said, "but I am rushing home now to look after a sick friend who is lying ill in Le Pouldu, Finistere, Brittany, after which I shall return to England to my home in East Grinstead, Sussex."

Can Be Exaggerated

Intelligence Not Always Due To Ability To Read and Write

In an article on the Prince of Wales, a writer in a London Sunday newspaper says: "You will not find him befuddling his mind with books." I do not remember ever reading a sentence with more curious implications. . . If books only befuddle the brain, then it would obviously be better if all the schools were shut and schoolmasters who teach reading, writing and arithmetic to innocent children should be sent to prisoon as public dangers. . . . . Still, we are inclined today to exaggerate the importance of reading and writing to the growth of the intelligence. A considerable percentage of human beings would be just as intellignt as they are at present if they had never learned to read or write, and I have known men who could not read or write and who were nevertheless better company, more imaginative and more intelligent than others who could. Speech plays a far more important part in the life of the ordinary man than reading and writing. It is possible for a man who can neither read or write to be either a good poet or a good farmer, and a world containing good poets and good farmers is a world in which any of us ought to be reasonably happy.

To Complete Study Of Arctic Flora

Dr. M. O. Malte, botanist of the National Herbarium, Ottawa, is carrying on investigations in the regions around Hudson Bay and Hudson Strait. He will collect botanical material and study northern plants in preparation for a comprehensive work on the flora of Arctic Canada. Dr. Malte visited posts in the Arctic archipelago with last years Canadian Government expedition and this summer's investigations are intended to confirm observations made in 1927.

Always Trustworthy

Senior Partner: "One thing I like about our new clerk is that he is trustworthy. You can always tell what he is going to do next."

Junior Partner: "And what is that?"

Senior Partner: "Nothing."

"What's the matter with you?" asked the cop at three thirty a.m.

"I'm lost," explained the wanderer.

"Don't you know your way home?"

"Sure I do, but that ain't where I want to go."

Pointing to 16 residents living within 100 yards of one another, who have a combined age of 1300 years, Shanklin, in the Isle of Wight, is claiming longevity record of the world.

It is best to be satisfied with your lot even when it might have been a lot more.

The arguments of the loquacious individual are mostly sound.

Developing Rust Resistant Wheat

Dominion Cerealist Says Goal Will Be Reached Very Soon

Within three years Western Canada should have a rust resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion Cerealist, recently.

Mr. Newman is spending a month or more in the west, inspecting the work of the Dominion Rust Research Laboratory, at the Manitoba Agricultural College, and the various Dominion experimental farms in the west. He will also visit farms where rust resistant grains are being produced for experimental purposes.

The Ottawa official announced that the work at the research laboratory at Winnipeg would be extended within a year. An expert cytologist, Miss Hollingshead, formerly of Saskatoon, Sask., and now at Berkeley College, Calif., has been added to the staff, he said, and will assume her new duties next spring.

The appointment, Mr. Newman said, is the first of its kind in Canada, marking a distinct advance in the linking of pure scientific research with the practical purposes of agriculture.

Another phase of cereal work which is engaging the attention of the department is the raising and marketing of high grade malting barley. "We have found that 'tribi,' a variety of barley grown in Manitoba, corresponds closely with the favored variety bought by Old Country brewers in California," Mr. Newman said. "Prof. S. C. Grant, of the Manitoba Agricultural College, is now in Finland to confer with the heads of malting firms there on the marketing of barley."

Explanations Are Logical

Expression "Odds and Ends" Goes Back To Time Of Shakespeare

"My brain," wrote Washington Irving, "is filled with all kinds of odds and ends."

Curious that we should say "odds and ends" to refer to a multiplicity of miscellaneous objects or details. And for the derivation of this colloquialism that has lasted for centuries, we have two interesting explanations.

"Odds," it is authoritatively stated is a straight corruption of the now obsolete English word "orts," which meant fragments. This word "orts" occurs frequently in the works of Shakespeare and Ben Johnson, in exactly this sense.

The other explanation is that the expression "odds and ends" comes from the old Saxon phrase "ords and ends," "Ord" was the Saxon word for beginning; so that in the old Saxon language, the phrase "ords" and ends" really mean't literally "beginnings and ends."

Both explanations seem logical and the probability is that they are both right and that the words "orts," is derived from the Saxon "ords," subseqhently becoming "odd."

No Place Like Home

The Invisible Ties That Bind Us To the Home Circle

The word "home" is indeed like unto an alabaster box of ointment, very precious, whose fragrance fills the life. Into it has been gathered our most sacred memories, our tenderest associations, our brightest hopes. It matters little whether the home of one's childhood has been a cottage on the hillside or a house in some city street—round it is woven a romance of interest that grows with the years; to it, from distant places alike of work and thought travels back the heart with wistful regret.—Millgrate Monthly.

A Student From China

Announcement is made by the Moose Jaw College that a record for distance will be established by one scholar who will attend this fall. This student is Chan Chick Foo, a graduate of Pui Ying Middle School at Canton, China, who is registered in the senior matriculation class. He sails this month from China to complete his University course in Canada.

Jasper National Park

Jasper Park, which is situated on the Canadian National Railways in the northern part of Alberta, has a total area of 5,380 square miles. A great portion of this huge mountain wilderness is still unexplored. The entire region is rich in historic association.

We know some men who claim to be self-made who undoubtedly cheated themselves.

"I seem to know your face."

"You ought to! It has been in every issue of the International Criminal Album!"—Dorfbarbier, Berlin.

CHAPTER XXX.—Continued

Only desperate men would ever have dreamed of such a plan as theirs. The camp was fenced with eight strands of barbed wire, and every sixth fence-post carried an arc light. But with the aid of a file which one of the men possessed, they would cut the two lower strands, at dusk, just before the lamps were lighted, and crawl through. At the last moment the other two men grew panicky.

"It is sure death," said one: "they'll catch us. I can see how they are watching us. I'd go, and take a chance only I have a wife and kid —I've got to think of them."

The other man declared the plan a foolish one on account of the weather. "January in Germany is too much like the corner of Portage and Main," he said.

A new batch of prisoners had come in that day, and one of them, who was standing near enough to hear, came to Jack and asked if he might go. He was a grizzled man of about thirty-five.

"I have no one depending on me," he said, "and I have already tried twice."

"Come along—sure," said Jack, "three times and out."

"Thank you so much," said the man heartily.

Jack was startled by his politeness. A prison camp does not always foster the social amenities.

"Your name is Doran, is it not?" asked his new friend.

"Mine is English—at least that is my nickname. We are both from Canada. . . . We might as well try it as die here . . . there is always a chance."

While the prisoners were taking their exercise just at nightfall walking up and down the enclosure listlessly, aimlessly, Jack lay beside the fence filing away the two lower strands of wire. This done he crawled through, English following. The prisoners, who were all in the secret, kept a sufficient number directly in front of them to hide them from the camp.

Out into the bog went the two desperate men, fighting for what we hold so lightly because we have never lost it. Their enemies were cold and hunger and the pitiless rains which seemed to fall every day. They journeyed only by night. Jack found his new friend's knowledge of the country to be remarkable. He seemed to know every village, and he spoke German as well as a native. In this way they were able to travel after dark on the roads, and once they got a lift from a kind-hearted waggoner, with whom English carried on a long conversation, eliciting the information that everyone was tired of the war, but it was considered the wisest course to give the English a proper beating and teach them not to start another. He asked them to come in to his house for supper, but they were afraid to do that, their Red Cross clothes would betray them. The kind-hearted man gave them some sticks of liquorice from a bag he was taking home to his children.

"This man is the true German," said English that night as they continued their journey, "genial, simple, hard-working. The Germany that I knew when I lived here was a land of music, fairy tales, and a certain child-like simplicity. There was an inherent desire to make things beautiful, to turn desert places into gardens. But I was always afraid of the Prussians and their cast-iron methods. That, combined with the simplicity of the Germans, has made the war possible."

The fugitives had need of all the advantages English's knowledge of the country and language gave them, for the season of the year was unfavorable. The leaves were gone from the trees, making shelter difficult; there were no vegetables in the gardens, no cows in the field to furnish hungry travellers with a handy meal, and they could not be sure of finding a spruce thicket or a wood of Scotch fir just when daylight was coming, but there was one advantage in winter travel—the nights were longer.

A hundred times Jack blessed the happy chance which brought English to camp that day. His knowledge of wood-lore was wonderful — he seemed to carry everything that was needed—a sort of Robinson Senior from "Swiss Family Robinson." He made a fire each morning in the gray dawn to dry their clothes, explaining to Jack that a fire was almost invisible then. In daylight the smoke shows, at night the flame, but in the steely blue dawn a fire can be enjoyed in comparative safety.

In two weeks they reached the river which would determine their fate. Beyond it lay Holland and safety. The first night they stayed in the woods on the bank, trying to think out a plan. The river was in flood, so swimming was out of the question. Uprooted trees floated in its current. Vainly they hoped for a boat or a raft. The magical happenings which come to travellers in books did not come to them—not a boat, not a raft, not even a rope.

From their cover in the trees Jack and his companion could hear the sounds from the other side of the river, the ringing of bells, the shunting of cars. There seemed to be only one way, and that was to attempt the bridge. It probably would be guarded heavily, but English's knowledge of German might help. It looked to be the only chance.

All day they waited for the night to come. They had two good German smocks, stolen from a clothes-line, and Jack had a warm pair of stockings. To get these English had gone boldly into a garden as they came through a village. He had a way of quieting the dogs by a peculiar whistle and this gave him a distinct advantage. The dogs who came out barking fiercely, changed their attitude when he spoke to them, and even showed a disposition to follow him.

"If the dogs could bring us food we would have plenty," he said that day, as they sat in the spruce thicket. "The chances are against us, Jack, but one of us may get over."

"One of us!" exclaimed Jack, "It must be both or none!"

"No!" said the other, "it does not matter much about me. No one cares so very much, and it happens that the one person who cares a little bit about me, cares very much about you."

Jack looked at his companion—dishevelled, dirty, long-haired and long-whiskered, his eyes bloodshot — and wondered if his mind were going. "And who is that?" he asked gently, as if he would humor his poor friend's mood.

"Your wife, Helmi."

"Helmi!" Jack repeated. "My Helmi!"

"Yes, yours—she is the only woman except my mother who ever cared whether I lived or died."

Then he told Jack of his quarrel with Larsen in Eagle Mines, and of Helmi's kindness, and of the week he had stayed in her house.

"She asked me to pray for you, Jack," he concluded, "and I kissed her golden hair. She told me she was sure you would go to the war, and asked me if I met you would I be your friend. That is why I came—it seemed as if I must come—when I found you at Vehemoor."

Jack's voice trembled as he spoke. "Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were hurt—they only gave me half the story. When I got back I found Helmi gone—gone without a word. She had been gone a week—I was a month late—but she might have waited."

The trees were throwing long, cold shadows over the sweeping current of the river.

"Did you not know there was a good reason for her going?" Arthur asked, after a pause.

"I knew nothing," said Jack. "What reason could there be?"

"She went to the city to a hospital to give birth to your child."

Jack's face grew white with pain. "How do you know?" he whispered.

"She told me. I wanted her to come to England and train as a nurse, and when I urged her, she showed me a little dress she had been making, and told me, and she told me she was glad. Her only sorrow was that you were away and the adventure you were on was dangerous."

"I did not know." Jack groaned.

There was silence then, when neither man could speak.

(T oBe Continued.)

Ancient Roman Relics

British Museum Presented With Objects Used During Roman Occupation Of Britain

The Governor and Company of the Bank of England have presented to the British Museum, among other objects found during the recent excavations for the rebuilding of the bank, a pipeclay statuette of Venus which is the work of an early Roman artist, and very rare. They have also, as a result of the excavations, presented to the Guildhall Museum several specimens of the fine red glazed ware of Gaul, commonly, but incorrectly known as Samian. This was a new thing when the Romans came to Britain, and for two centuries it was one of the most characteristic Roman products. Every self-respecting Roman household had this ware in the dining-room, and much valuable information has been obtained from the names of the makers stamped on the pieces.

Abundant in Roman London, which even then was a business centre, were the styli, slender instruments made of iron, one end pointed and the other flat, for smoothing the wax surface of writing tablets. Among the toilet requisites are bronze hairpins and a spoon with a very narrow bowl of gold for obtaining the lip-stick out of narrow bottles, ornamental pins, ear-picks of bronze which are found separately, and as parts of little manicure sets.

A curious ring, of which the stone has been lost, is wrought in bronze, and recalls the regulation forbidding anyone below a certain rank to wear gold ornaments. There is a solitary specimen of the iron bent hook in use by the Romans, and several specimens of their morterium, a fine large basin, in common use for mixing and pounding various kinds of food.

"I notice that the humorists have been picking on the mosquito a good deal lately," writes J.R.M. "But I can assure them that the mosquito has his good points. He's a hospitable chap; he'll give you a bite and a swell time afterwards."

An auto bus company in Europe is compelling each passenger to buy in addition to the regular ticket, a special slip covering his share of the gasoline tax.

Papa—"But has he any self-confidence?"

Pearl—"He must have, Dad. He opened a checking account with borrowed money."

Political Supporter: "Are you finding the campaign interesting?"

Would-be M.P.: "Well, I am certainly learning a lot about my past I never knew before."

The kind of person Barnum said was born every minute is now born twice a minute.

The name "midshipman" for cadets originated in the English navy about 200 years ago.

Pity the poor moth who lives in a fur coat in summer and a bathing suit in winter.

HERCULES
TRADE MARK
PERMANENT BUILDING PAPER

Beauty in a home may be only skin deep.

A beautiful home is not always comfortable nor easily saleable.

Hercules does for a home what beauty cannot. Tested and proven wind proof and damp proof, Hercules makes a house warm and dry at all times—the home that buyers seek.

Hercules comes in three grades —x, xx, xxx—for various needs. How Hercules fulfills our claims is easily understood after an examination. May we send a few samples?

May See Rocket Car

Queer German Car and Speed Boat To Be Demonstrated In England

Lancastrians may be the first in England to be treated to a demonstration of the amazing rocket car which has been amusing Germany for some time. Herr Kurt C. Volkhart, who drove the first rocket car, is in London to introduce a 250 miles-an-hour car and 100 miles-an-hour boat, both rocket propelled, to the British public.

One who has discussed the project with him says that the car will be made in England. He also says that the silencer regulations enforced at Brooklands as well as the problem of steering the car at the speed he aims at definitely put the question of a test on the famous Weybridge track out of court, and there remain only Pendine and Southport.

Whether the Royal Automobile Club will refuse to time the attempt on account of the comparatively short Lancastrian beach, as they have the proposed new world's speed record attempt by Captain Campbell, remains to be seen, but the rocket enthusiast claims that by reversed action the car will stop in a much shorter distance than any other car going at equal speed.

An Odd Accident

Driver Of Car Becomes Unconscious When Stung By a Bee

Stung to unconsciousness by a bee, which got into his eye while driving along the main highway between Port Arthur and Fort William, W. H. Matthew, of Plainsville, Wis., a visiting tourist, drove his atuomobile head on into a truck proceeding in the opposite direction and suffered minor injuries. Matthew saw the bee buzzing in front of his face and attempted to brush it away when a rush of wind drove it into his eye. Pain and shock rendered him unconscious in which condition he remained until reaching hospital.

The seasick passenger probably wishes he had sense enough to know when he was well off.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE SIX YEAR MOLAR

You have heard your dentist call this first double tooth "the six year molar."

Why is this? You have perhaps guessed it—that it is because it erupts usually at about the sixth year.

Now, you have been observant enough to note that it is a first tooth in the sense that no tooth was lost to make room for it.

And coming in at this early age, you may have thought it a "baby tooth" which would, in due time, be shed.

So, in your child, you have perhaps neglected to give it the care that it deserved—with disastrous results.

Without doubt, this neglect is the most common of dental sins committed by parents, and perhaps with gravest consequences to their children.

Because, should this tooth become so badly decayed within from four to six years following its eruption as to infect the "pulp," your dentist as a rule, has no recourse but the use of the forceps—and, losing the tooth, the whole series is deranged, since, in a real sense, this six year molar is the key tooth of the dental arch.

However, Nature is gracious, for sometimes you will find that where this tooth has been lost at an early age, the second molar has "drifted" forward to fill the space, with the third molar advancing in turn as it erupts. But this is only rarely the case—better a little care at the proper time to prevent this trouble rather than to rely on Nature for a cure.

Last Words Of Swedish Scientist

Dr. Malmgren Urged His Companions To Save Themselves

The last words of Dr. Finn Malmgren, Swedish meteorologist who died on the ice off Brock Island while seeking to reach land after the Italia disaster, were:

"Please go, please go, and tell in Sweden why I couldn't come back," said Captain Alberto Mariano, pilot of the Italia.

Captain Mariano, part of whose leg was amputated after being frostbitten, was taken to a hospital in Stockholm on his arrival aboard the Lapland express. He was left behind in Norway when the rest of the rescued crew of the Italia returned to Italy, bcause of his serious condition. He will probably remain in the hospital at least three weeks.

The captain said that when he and his two companions left the Italia party on May 30, they took food for 30 days on small rations. The only weapon was one axe with which they hoped to be able to kill a bear. Lying flat on the ice they tried to lure the only bear they met to approach, but the bear never came near enough.

Reindeer Races

Proposal Is Made To Stage Novel Attraction In Western Canada Next Winter

Dog, horse, motor and airplane races have in turn delighted and and amazed the public, who are now commencing to wonder if there is anything new under the sun in races. This question, however, is about to be answered by H. J. Opsahl, formerly of the Dominion Reindeer Company, which has headquarters in Vancouver, B.C. Mr. Opsahl proposes to stage a series of reindeer races, the first in history, with 20 reindeer and six Eskimos to drive and care for the animals, he will tour western Canada during the coming winter, visiting the cities where race tracks are available in exhibition grounds.

The points mentioned by Mr. Opsahl include Prince Albert, Saskatoon, Regina, Calgary and Winnipeg, and crossing over into the United States, he intends taking his train of racing reindeer into Minneapolis and St. Paul, and work his way to New York.

Co-Operative Wool Growers

Shipments Already 50,000 Pounds Over That Of Last Year

With the shipment of 12 carloads of domestic wool from Regina, recently, the Canadian Co-operative Wool Growers' Association is already 50,000 pounds over last year in its shipments from Saskatchewan and Manitoba, according to W. W. Thomson, manager, at Regina.

Mr. Thompson said two more carloads would complete the season's work, and he anticipated that in the next two months the 1926 shipments would show a total increase of about 100,000 pounds over those of 1927. A substantial increase also had been shown in the range wool shipped from Maple-Creek.

Bim—"So your wife is very broad-minded?"

Bam—"Yes, she believes there are always two sides to an argument—hers and her mother's."

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

The world's record for the one-mile walk, was set by G. H. Goulding, of Toronto, Canada, in 1910. His time was 6 minutes and 25.8 seconds.

Contract For Plane Hangar

The defence department is going to construct a large hangar for airplanes at the Rockliffe Airdrome near Ottawa, and the contract has been secured by MacDonald Brothers, Ottawa, the amount being in the vicinity of $53,000, it was announced.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were rgular. All mothers should keep Baby's Own Tablets in the house, for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Granted Temporary Parole

Two Negroes Sentenced To Death May Escape Penalty

Governor Graves, of Birmingham, Ala., granted a temporary parole of 60 days to two negroes convicted of murdering a negress who later returned to her home after several months' absence on a visit to relatives. The two men were charged with chopping the woman's bady in pieces and throwing them into the Alabama River. The parole was granted pending an official investigation.

According to a recent announcement, Tokio, Japan, has nearly 6,000 confectionaries and bakeries, and only about 1,000 meat markets.

Let Minard's Liniment Relieve Pain.

Canada has, it is estimated, 100,000,000 acres of grazing land in the West.

Little Helps For This Week

"And now men see not the bright light which is in the clouds; but the wind passeth, and cleanseth them.—Job xxxvii. 21.

His purposes will ripen fast,
 Unfolding every hour;
The bud may have a bitter taste,
 But sweet will be the flower.
Blind unbelief is sure to err,
 And scan His work in vain;
God is His own interpreter,
 And He will make it plain.
 —William Cowper.

There is nothing in what has befallen or befalls you which justifies impatience of peevishness. God is inscrutable, but not wrong. Remember if the cloud is over you that there is a bright light always on the other side; also, that the time is coming, either in this world or the next, when that cloud will be swept away, and the fulness of God's light and wisdom poured around you. If your life is dark, then walk by faith; and God is pledged to keep you as safe as if you could understand everything.

—Horace Bushnell.

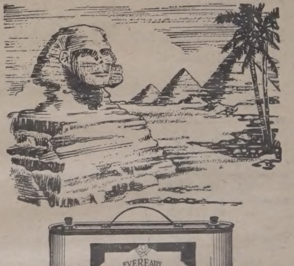

The Many-Purpose Oil.—Both in the house and stable, there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

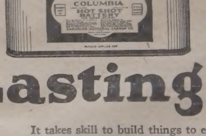

Pisron Rtform In Prussia

Prisoners Awaiting Sentence To Be Well Treated

Dreary dungeons, bare walls, and iron-barred windows will be a thing of the past for Prussian prisoners awiting trial if reforms which are planned by the Prussian Department of Justice are put into effect. Instead the prisoners are to have two cells each—a parlor and a sleeping cell.

The cells will be as homelike as possible. The walls will be decorated with pictures. Curtains will adorn the windows and hide the ominous iron bars, and each parlor cell will be equipped with a wireless receiving set. This two-cell scheme, however, is intended only for prisoners awaiting trial. Ordinary convicts will not share in these comforts.

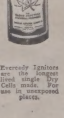

Lasting!

It takes skill to build things to endure. Anyone can build a battery — but only Eveready can make a Hot-Shot!

30 years of experience have taught Eveready how to put the longest life into batteries for farm ignition. From the current-making materials to the waterproof steel case, every feature of these famous power plants is rigidly tested by highly trained chemists, engineers and battery builders.

Each battery bearing the name Eveready bears a full guarantee of satisfaction. Remember, if it's not an Eveready, it's not a Hot-Shot.

Eveready Ignitors are the longest lived single Dry Cells made. For use in unexposed places.

Canadian National Carbon Co., Limited

Calgary Vancouver TORONTO Montreal Winnipeg

EVEREADY Dry Batteries —they last longer

COMBINES!

Before purchasing a combine see the Minneapolis and Holt, with independent pick-up and end delivery Swather, the only system that has proven a real success.

The Minneapolis combine is built for the North American continent to contend with heavy crops of straw, which require much more room for separation.

We also have a number of good buys in Second-hand Tractors and Separators.

THURSDAY, AUGUST 16, 1928

Alex Ross Heads Compensation Board.

The appointment of Alex. Ross, former Minister of Public Works in the Alberta Government, to the position of chairman of the workmen's compensation board, succeeding John T. Stirling, who recently resigned on account of ill health has been announced by Premier Brownlee. It is felt that Mr. Ross' administrative experience and familiarity with workmen's compensation legislation will particularly qualify him for the duties of his new position which he will assume on Monday next.

Local and District

Mr. and Mrs. E V Springbett are in town.

• • •

Jack Brown and his threshing outfit have arrived.

• • •

Mr and Mrs W Barss are visiting in Calgary and Nanton this week.

• • •

Miss E. Irving, of Calgary, is visiting her father, D. T. Irving.

• • •

R K Henderson, of Vancouver, formerly of Delia, is in town for a short while.

• • •

Miss Ethel N. Baines, of Gadsby, Alta., spent the week end with Mr. and Mrs. Henry Moore.

• • •

Miss Dorothy Burke left Thursday for Acme, where she will be the guest of Miss Loreen Hunt.

• • •

Miss M J. Fairlie, of Pipestone, Manitoba, is spending the week with Mrs. Henry Moore.

• • •

There will be a Catholic service held on Sunday next in Coates' Hall, at which several of the children will recieve First Communion

• • •

Mrs T Stout, of Los Angeles, California, was a visitor with Mr and Mrs F W Benson last week.

• • •

Mrs. Norman Burke and daughter Margaret returned home Tuesday last after a five weeks' vacation at the coast.

• • •

Roy Anderson and Tommy Hubbard left a week ago Monday on a motor trip through Spokane, Wash. and Vancouver.

• • •

In the reports just issued of the recent Departmental Exams., Dorothy Burke was successful in passing Grade XI., with honors.

• • •

Mr. and Mrs. E R. Tillotson, who have been motoring at the coast for the past month, arrived home the latter part of last week.

• • •

Mr and Mrs C Grant and family and Mrs Grant's parents, Mr and Mrs Simpson of California, motored to Sylvan Lake on Sunday, to spend a couple of weeks there.

• • •

Rev. Mr. and Mrs. Hobden and family have returned to their home at Vancouver, having spent the past three weeks with Mr. Hobden's sister and brother-in-law, Mr and Mrs. Jack Sinclair.

• • •

Mr. and Mrs. Thos. Goodison, of Brockville, Ontario, are the guests of Mr. and Mrs. Stan. Walker, of the Queens Hotel. Mr. and Mrs. Goodison are the parents of Mrs. Walker.

• • •

When a man who is not used to woods lights a match and later throws it on the ground, he expects it to go out. But when an experienced woodsman is through with his match it is out. He does not leave it to expectation. He knows.

• • •

Mrs Hamilton and boys, accompanied by her niece Miss Murchie, returned yesterday from Sylvan Lake. Miss Murchie leaves today for Prince Rupert and the coast cities, on her return to Lennoxville, Que.

• • •

W N Graburn, Barrister, leaves tomorrow (Friday) by auto for Winnepeg and the Lake of the Woods. On his return he will stop at Regina, where he will attend the Canadian Bar Convention. He expects to be away for about ten days.

• • •

Mr. and Mrs. Julius Julson and family, Mr and Mrs T. Thompson and Mr and Mrs Rodseth, have just returned from a four weeks' trip through the mountains of British Columbia, and through Washington and Oregon.

• • •

The following pupils of Delia School were successful in obtaining their Grade VIII. diploma:—George Lowe, Clarence McKee, Alex Morrison, Peter Thompson, Kathleen Warke, Sidney Zakariasen, and Ole Peterson.

• • •

The Auction Sale of 114 head of horses, the property of Glen House, rancher, of Gleichen, held on Saturday evening last at the Delia Stock Yards, was well attended, many farmers and dealers coming from far and near. Almost all the horses were disposed of, and good prices were realized. W. C. King was the Autioneer.

J W and T T Morris left on Tues. evening by auto for Saskatoon, on a visit to friends for a week.

• • •

The friends and neighbors of Russell Moore will be pleased to hear that, after many attempts he at last has struck good soft water. Mr. S P. Brown, the fifth driller to drill the seventh hole within a few feet of the others, successfully shut off the bad surface water. So if you want good water try Mr Brown, the experienced driller.

• • •

The weather, which was mostly fair and warm during the last few weeks, had a rather disastrous break for some of the farmers north of town last Saturday evening Up to then no damage to the splendid crops in this district by hail, or otherwise, had been reported. During an electric storm, passing over the vicinity of Long Lake, about 20 miles north of town, the following, amongst others, were badly hailed:—John Olson, Bob Armstrong, Dave Shand, R. Stoness, Hugh McLaren H. Crosweller, Art and Geo. Hoover, John Nelson, J McMurchy, W. B. Dunlop, A. Reib, Sam Thompson, G W. Atkinson J. F. Hall, E. M. Young, Jake Morlock, Percy Gates, Cap Sloan, Nels Lewis, G. Cammidge, etc. In many cases damage to crops were estimated at 100 per cent loss. It is said that the hailstones were so large that windows were smashed and fowl killed. On Sunday night there was a strong wind, and cooler temperature. Towards Monday morning there was thunder and a heavy downfall, lasting well into the day. On Tuesday night the first slight frost of the season has been reported.

Craigmyle News

Col R B Eaton, F F Paterson, Jim Eaton, Douglas and Bruce Eaton and Bill Paterson returned home on Monday evening after spending a week in the mountains.

Alexander Bain has disposed of his business and property here to Percy Le Vesconte formerly of Stettler, and the latter will take over the premises on the 1st of September. The transaction was arranged by W A Hanton, of Calgary.

Mr and Mrs Thos McKee, J M Armstrong, John McLean and W M Miller have been spending a holiday at Canmore and Banff.

A W White went to Calgary on Sunday to see Mrs White who we regret to state is again in the Holy Cross Hospital there. Mr White returned home the same night and reports Mrs White's condition as being about the same.

Geo A Robson formerly of Bindloss has taken over his duties here as Elevator Agent of the Wheat Pool, and has assisting at No 2 Elevator James A Lamont formerly of Hanna.

Mrs G McHarg and son, David, returned home at the end of last week after spending the previous five weeks visiting in B C.

Mr and Mrs H D Crouse and three daughters returned home last week after holidaying at Calgary and Innisfail.

STONELAW NEWS

The Farrell Lake School teacherage is about complete. Mr. McAravey is building the chiminey this week.

HAND HILLS ECHOES

We are glad to report that Mrs T McBeath, who has been very ill, is able to be around again.

A good time was held at the Hand Hill school on August 10th, where a dance was held in honor of the O B Richardson family who are leaving the 14th of this month for Moscow, Idaho, and a presentation of a water set was made to them. Friends and neighbors from all around, bidding them good-bye, hoped to see them back next Spring Mr Richardson is not leaving until after harvest.

A Hunley, of Fish Lake, who had his collar bone broken, when his horse fell with him, has been under Dr Crawford's case.

Mr T Clark has been very ill with pneumonia, but is progressing favorable.

There will be a dance at Hand Hill school on Friday, August 24th.

We congratulate Mr and Mrs Walter Scott on the birth of a son, born Saturday August 11th.

Mrs Herron has been very ill at the Craigmyle Hospital, but is progressing favorably.

Many a small boy is kept in after school because his father worked his arithmetic wrong.

Service Station, H.O.C.M.G.

Just Arrived!

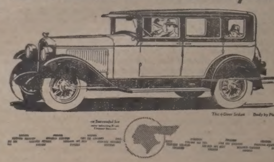

A large shipment of Headlight Overalls. The undisputed King of overalls on the North American continent. We have them in all sizes, boys included.

If you want good Mitts and Gloves, we have a full line of Clark's, the oldest glove makers in Canada.

Our new samples of International Clothing, "Tip-Top" and "Big Four," just arrived. If you need Clothes, look them over.

D. H. CAMPBELL
SERVICE STATION FOR MEN

SMOOTHNESS and ENDURANCE
never before known at the price

WITH its sound basic design and its background of scientific development on General Motors Proving Ground—with its production advantages provided by the vast facilities of General Motors with its score of engineering advancements, including the famous G-M-R cylinder head—

—Pontiac Six offers a combination of smooth six-cylinder performance and high-speed endurance, the equal of which is found in no other car in the world selling for so low a price.

Its smooth, silent performance, combined with the beauty and luxury of its Fisher bodies, provides a measure of owner satisfaction unequalled in its field. And its tremendous endurance results in unparalleled length of life, which in turn, is expressed in consistently high resale value.

More important reasons for the selection of any car have never been found. That's why ever-increasing thousands are choosing the Pontiac Six . . why Pontiac sales for 1928 are far ahead of previous records.
